

# Premium Bark Nuggets 30mm

These mid-size nuggets are popular due to their decorative features and tidy finished look they create on the garden. The nuggets go through an extensive screening process to remove the stringy cambium bark, leaving behind a 20-30mm ornamental nugget that will complement any commercial or residential setting. During the refining process the nuggets also pass through our state of the art wash plant to remove stones and other impediments.

Having a good layer of bark nuggets not only looks great by adding the finishing touch to your garden, its other benefits include aiding in weed suppression and soil moisture control. Our Premium Bark Nuggets are both **CSS Bark Mulch - Coarse Grade**, and **CSS Bark Mulch - Premium Grade** approved
