

# BioGro Certified Compost

Intelligro Compost provides organic matter naturally and boosts microbiological activity and carbon content to your soil. It also aids in moisture retention and improvement of soil structure for both crops and mixes. It is rich in essential nutrients like nitrogen, phosphorus, and potassium. Contains micronutrients to help stabilise soil pH levels, ensuring an optimal growing environment. We manufacture to a consistently high standard at our sealed surface facility, free from contamination, residual herbicides and synthetic additives. Regularly QA tested both in our own onsite laboratory, and externally at Hills Laboratories. Our compost is **CSS Compost and Soil Conditioner approved**

## Benefits

- Increases organic matter in soils
- Stabilises pH levels in soils
- Increases aeration and drainage
- Increases plant root development
- Weed Free

## Compliance

- BioGro Certified #364
- Meets NZ445:2005 compliance standards
- Hill Laboratory - Annual analysis
- Fortnightly grow tested for Pyralid Herbicides
- CSS Compost and Soil Conditioner approved

## Product Specifications

- |                    |            |
|--------------------|------------|
| • pH Levels        | 5.5-7.5    |
| • Organic Matter   | 57-72%     |
| • Total Nitrogen   | 1.1-1.2%   |
| • Total Phosphorus | 0.19-0.22% |
| • Particle Size    | 0-8mm      |
| • Bulk Density     | 650kg/m3   |

*Sustainable, environmentally friendly and containing no green waste. Our Compost reduces reliance on synthetic fertilisers and herbicides, incorporating a blend of natural products that have been diverted from landfill.*

 This product is sustainably sourced and produced.

## Recommended Use

- Vegetable and flower beds
- Raised garden beds and planters
- Heavy clay soils
- Tree pit mixes

## Inputs

- Pine bark fines
- Wood fines
- Peat
- Straw
- Cow manure
- Chicken manure

**\*Note there is no Green Waste in our compost**
