

Premium Bark Nuggets 20mm

Premium Bark Nuggets 20mm is a premium grade bark product made from carefully selected and processed pine bark. These decorative nuggets look great on the garden and create a nice finish to your outdoor area. These nuggets are excellent on areas where you want a contemporary look with a more subtle touch, especially in malls, arcades and on inner-city gardens. They are excellent where you have smaller plantings, as the bark complements the size of the plants, as well as aiding in weed suppression and soil moisture control. During the refining process the nuggets also pass through our state of the art wash plant to remove stones and other impediments.

Our Premium Bark Nuggets are both **CSS Bark Mulch - Coarse Grade**, and **CSS Bark Mulch - Premium Grade approved**. They also meet the **NZS5828:2015 / EN1177:2018 playground surfacing standard**
