

CAPABILITIES STATEMENT

**KEY STAFF MEMBERS
CERTIFIED AND ACCREDITED
WITH:**

- ASIS Physical Security Professionals (PSP)
- Department of Defense Anti-Terrorism Level 3
- Secret/Top Secret Clearances
- Authorized access to classified information (SF312)
- Counter-crime (CPTED)
- LEED conformance
- Experts in Unified Facilities Criteria (UFC 04-010-01, UFC 04-020-01)
- Experts in VA Physical Security Design, Mission Critical and Life Safety (VAPSDM Jan 2015)
- Masters of facility design criteria -- IBC, IMC, NEC, NFPA, ADA, UFC, and JCAHO

D&B: 080235805
CAGE CODE: 7MJS9
NAICS: 541310, 541330, 541519, 541611,
541690, 541990

TERRORISM

CRIME

NATURE

The FORCE PROTECT staff includes consultants and designers with advanced training in physical security (crime prevention, anti-terrorism, nature mitigation). Together, this collective experience gives us insight into all aspects of safety and security measures that can be integrated into any project through site planning, security engineering, building design and security force procedures. This knowledge allows us to see the global scope of the project and offer viable approaches to achieving asset and life protection.

Our consulting services include:

- Threat Assessment (Crime, Terrorism & Natural - local, national, international)
- Vulnerability Assessment
- Risk Assessment (threat probability vs vulnerability)
- Risk Mitigation Design Measures (provide detailed guidance)
 - Architectural Security
 - Crime Prevention Through Environmental Design
 - Perimeter Security Systems
 - Electronic Security Systems
 - Policy & Procedures (Security force, employees, visitors, contractors, VIPS)
 - Life Cycle Cost Analysis of All Measures
- Design Team Support (design drawings, specifications, hardware/software schedules)
- Prescribe Security Force staffing (proprietary or outsourced)
- Authorship and Training of Crisis Preparedness and Response Procedures (Active Shooter, Bomb Threat, Hostage Situation)
- Authorship of Continuity and Emergency Planning

www.force-protect.com

Far too many facility owners take the threat of local terrorism for granted. The attitude of “that will never happen to us” was all too long shared by U.S.-based building tenants nationwide...until Timothy McVeigh in Oklahoma City. The same attitude served well with facility occupants of Centennial Olympic Park during the 1996 Summer Olympics, the World Trade Center and Pulse Nightclub in Orlando. With the real threat of foreign terror organizations and domestic violent extremists (to name a few), the basics of force protection must be applied in all mass occupancy buildings. This is especially true of healthcare, education, industrial and public gathering venues (i.e. sports arenas, shopping centers, etc.).

As for crime; individual, gang and militia-connected threats such as larceny, burglary, battery and rape need not be ignored. Disgruntled employees, customers, patients, students all pose a risk regarding active shooter actions, assault, and other violence in the workplace. Any one of these acts could cripple your operation, as well as affect the financial livelihood of your business and psychological health of your workforce.

How often do we not consider the acts of nature except when it's too late, having power and other key utilities go down due to vicious storms, extreme cold or earthquake activity. This is why redundancy in utility service is critical. Additionally, safe haven provision for occupants is incumbent upon the facility owner. Of course, let's never ignore the need for contingency plans to ensure our business mission continues to operate, amidst a natural or manmade disaster.

Force Protect Security Consultants encompass anti-terrorism and counter-crime enhancement through advanced design of physical security hardening. Our track record speaks for itself, having conducted work in 62 Veterans Affairs Medical Centers, 6 Department of Defense Installations and numerous other Federal facilities, nationwide!

Representative Projects

VA Medical Center, Dublin, GA
Community Living Center Expansion
Project Value: \$2,479,000

- Counter-elopement fencing and stand-off planters
- Video Assessment and Surveillance System (VASS)
- Physical Access Control System (PACS) with biometrics
- Interior Intrusion Detection Systems (IDS)
- Expanded and updated Panic/Duress system
- Security lighting and signage
- Protection of critical MEP utilities

Staff Judge Advocate Courthouse, US Army Corp of Engineers
Fort Campbell, Kentucky
Scope Value: \$210,000

- Emergency task order to aid General Contractor on US Army Corp of Engineers
- stop-work order on 12,200 SF SJA Courthouse
- Conducted terrorism bomb blast assessment for a new structure resulting in a redesign of window and door structural fastening
- Designed door & window framing, connections and installation in compliance with DoD UFC 4-010-01 Anti-terrorism Force Protection Standards
- Liaison between GC, Corp of Engineers and product vendors, ensuring they comply and meet delivery suspense

VA Montana Healthcare System, Fort Harrison, MT
Force Protection Improvements
Project Value: \$2,000,000

- Main entrance checkpoint via barriers, guard house, adjustable traffic pattern, canalizing fencing
- Seamless tie-in with neighboring tenants
- Strategic video surveillance coverage with analytics
- Campus-wide monitoring via Security Control Center (SCC)
