

To All,

As mentioned at the March Board meeting, I am planning a Honey Do Weekend at the SCTA building. Yes, the date has changed due to family commitments from what was announced at the February Board meeting! As of the date of this email, no chains are required for access to the SCTA building. LOL

Honey Do Weekend at the SCTA Building: April 29th, 2023 7 am until closing

Once again, we are hoping to do our yearly maintenance on the building, the house, the assigned club trailers, the new Radio Announcers Trailer based in Wendover, and any other maintenance needs.

Some of the listed items are generic. Please contact Werner Schwarz if you require any help with your assigned or unassigned projects. This is an aggressive amount of work, so all clubs need to make sure to supply volunteers for the day. Please forward this email to your Club members! Lunch will be provided. Hopefully we will not have to finish up on Sunday. Several of these items carry over from previous years. I am leaving them on the list, just in case.

From the 2022 Elmo Procedure I see under Maintenance:

Timing Trailer and Eq.	Gear Grinders
Emergency Response Trailer	Bill Lattin to supervise
Equipment Trailer	LSR
Tower Side Cone Trailer	Milers
Return Side Cone Trailer	Road Runners
Fence Trailer	SDRC
Announcer Trailer	Sidewinders
Motorcycle Trailer	Sidewinders
Registration Trailer	Super Fours
Gear Grinders	

- Service timing trailer generator
- Replace batteries in the smoke alarm
- Spare tire?

Sidewinders

- Service announcer's trailer generator
- Service motorcycle trailer generator

Thank You all for your participation.

Werner
