

# SW PRE TRIP 2022 UPDATE

## Update #1 - 6/22/22:

Early this morning the drag crew took off for Salt Lake City to pick up the drag trucks. The rest of us went to the Salt to begin setting cones to guide the drag crew. We were greeted with firm smooth Salt! As we started to set cones, our smiles quickly turned to frowns. Campfires & other debris left behind by irresponsible people was strewn all over! It all had to be picked up before we could even think about dragging! There is just no reason for that. With that being said, just about the time the drag crew returned from SLC the cleanup was completed (at least on one course). Once the dragging started our frowns went to smiles again. Dragging continued through the day until Course #1 (Long Course) was completed. We will start on Course #2 (Combo Course) first thing in the AM!

Getting back to Course #1 for just a moment. It really is firm & smooth all the way down. We groomed it to the 8 Mile! So, all in all, after the "cleanup" things are looking very racy. As we all know much of what we end up with is up to Mother Nature. So please keep thoughts for Mother Nature! And maybe even do a little Salt Dance. We might just be lucky enough to have GREAT Salt two years in a row!

More tomorrow.....The Pre-trip team

“SEE YA ON THE SALT!”
