

SW Pre-Trip Update #1 – 7/10/24:

The pre-trip team arrived to Wendover yesterday and went to the salt early this morning. We would like to thank everyone for leaving our survey markers, it made our job easier.

When we made it onto to the salt, we drove to the 5-Mile on Course #1 and then backtracked to the Starting Line to get a center line for the drags. Then went back to the 5-mile and continued out to the 9-mile for a center line. We made it out to the 10-mile before it starting getting soft.

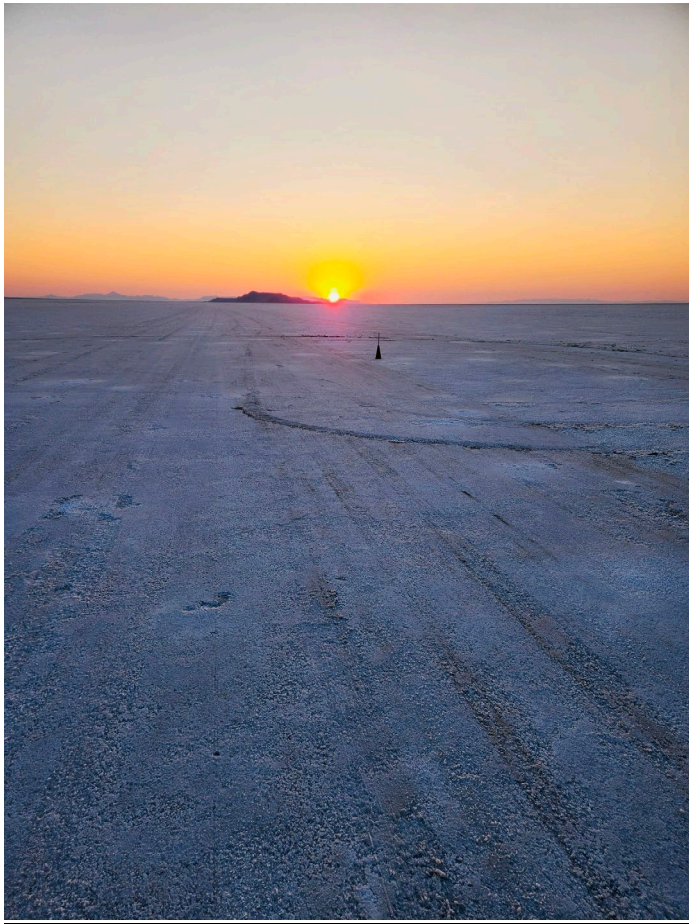

From there we drove out to the dike by Course #2 and then went to the 8-Mile and continued to the Starting Line to get a center line and lay cones every ¼ mile for the drags.

We will be dragging Course #1 today with a light polish drag. We will update again tomorrow.

See ya on the Salt,

Pre-Trip Team
