

How KBCI can help you

New Digital Products & Services

- Due diligence on proposed product and service providers
- Business operating models including internal and external stakeholder agreement
- Digital operating models, client onboarding and product fulfilment
- Performance dashboards and real time management information
- Governance models, risk frameworks and regulatory reporting

Process Automation Re-Engineering & AI

- Due diligence and support of vendor selection
- Establishing the internal operating model – both technical and business
- Review of proposed processes including cost benefit analysis
- Documentation of processes in line with agreed standards
- Implementation support for processes including training and upskilling of internal resources

Mergers & Acquisitions

- Analysis of existing books including income attribution, regulatory returns (specifically RMAR) and income based valuations
- Data analysis, data mapping and migration input
- Transposition of data from physical archives to digital systems
- Post migration support, system training and trouble shooting
- Ongoing support including MI

Remediation Programmes

- Regulatory remediation investigation and analysis, programme design and delivery
- Proposal and agreement of remediation in agreement with the relevant regulatory body
- Execution of agreed remediation including SME and volume resourcing
- Internal and external audit reporting and management information
