

# PROMENADE TRANSITION® | PTZ

AVAILABLE CAPACITY IN GALLONS 36G | 51G | 72G | 102G

## STREAMS BY THE GALLON

No matter what you're collecting, with just one liner you can remove or re-size your existing streams—and even add new streams that are required or mandated.

## GALLONS = STREAMS

36G = 1-2 streams | 51G = 1-2 streams | 72G = 2-4 streams | 102G = 2-4 streams

SKU	WEIGHT	CAPACITY	STREAMS	DIMENSIONS
PTZ36-1	111LBS / 50.34 KG	36 USG / 136 L	1	27.25" x 19" x 51.50"

## PROMENADE TRANSITION® | PTZ RECYCLING / WASTE CONTAINER

This sleek, high-performance bin is tough enough for all seasons, yet versatile for both outdoor or indoor use. The slanted roof is engineered to keep the elements out, and features eye-level graphics to help protect your streams from cross contamination.

### TRANSITION SERIES = SCALABLE SOLUTIONS

Protect your investment and scale your streams as needed with our flexible, future-ready Promenade Transition® line of recycling bins.

#### MATERIAL

- HDPE recycled plastic lumber

#### INCLUDED

- Standard Opening Shapes
- Standard Graphics
- 10 standard colors
- 9 standard openings
- Transition Liners

#### OPTIONAL

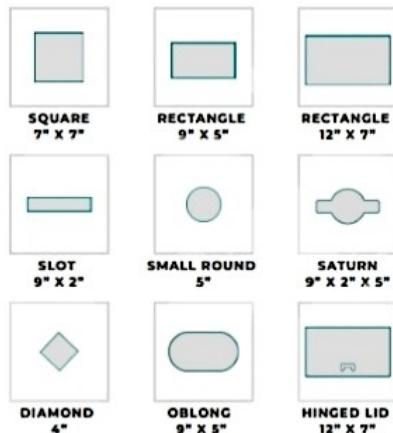

- Custom Opening Shapes
- Custom Graphics
- Custom Colors
- Door Signage
- Anchor Kits
- Locks

#### COLORS

#### OPENING SHAPES

#### Faster Servicing

Bins designed with your custodial team in mind, are easier to open, faster to service and include convenient ergonomic details your staff will love.

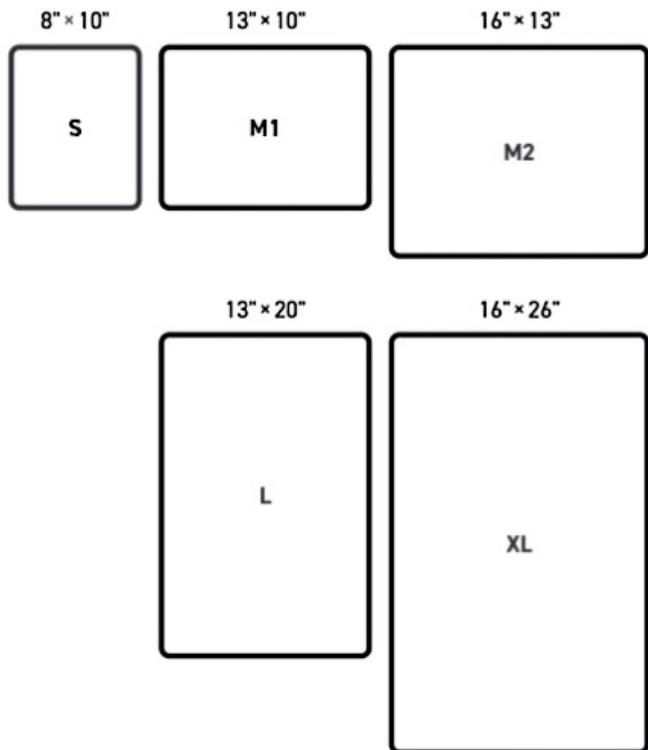

#### Cleaner Streams

Receptacles with the right-sized openings based on what you're collecting keep waste from flowing into the wrong streams.

#### Sustainable Materials

Bins made of HDPE plastic lumber (with recycled materials diverted from landfills) are not only weather-proof, durable, and easy to maintain—they're simply better for the environment.

## GRAPHICS

Graphics, labels and posters are a great way to support your recycling programs. And at CleanRiver Recycling Solutions, we make sure they support the environment too.

Our state-of-the-art printing equipment includes a top quality, wide format, UV printer for indoor and outdoor applications, which can perform direct-to-substrate printing. That means we can print directly onto numerous types of materials.

Print capabilities include but are not limited to: Posters, tent cards, banners, stickers, and material goods

### Posters & Stickers

We offer posters and stickers in various sizes to support communication, be it organizational information or waste stream directions.

### Resin

Resin inlay brings a touch of sophistication and unique beauty to any design, boasting a rich palette of colors, textures, and patterns. When cured, it provides long lasting durability. The power of customization lies in your hands with resin and endless color options and designs, unlocking a world of possibilities.

# THE HDPE ADVANTAGE

Our units are built from recycled High Density Polyethylene (HDPE) plastic lumber. The plastic lumber debris collected during our manufacturing process can be shipped back to our supplier who then regrinds the chips and recycles them into new plastic lumber, closing the loop on a complete cradle-to-cradle (C2C), waste-free lifecycle for our recycling containers.

Simply return your used unit to us and we will break it down and return the material to our supplier to be re-introduced into the cycle. CleanRiver recycles, on average, 20,000 lbs of HDPE per month. We also installed a series of chip extraction systems to collect shavings from our manufacturing process. The chips are collected in a hopper and transported back to manufacturers to be reused for other plastic goods.

	HDPE	Aluminum	Wrought Iron OR Stainless & Galvanized Steel	Wood
Long-lasting durability	●	●	●	
Impervious to oil, water, and chemicals	●	●	●	
Resistant to mold and mildew	●	●	●
