## '40-'41 WILLYS PRICING

### BODY

Available as Coupe or Roadster

All fiberglass parts are hand rolled in Isotalic Resins. Glass material is a combination of chopped Glass, Matte, Unchopped Roving & Unidirectional Weave. While many debate the different techniques of laying up as being the "best", we have found that only a combination of all the lay-up methods produce a superior quality "street use" car body. Having made thousands of bodies since 1984, our opinion is backed by substantial experience over a long period of time.

**\$7,995**

### ASSEMBLED BODY
