**Payment Term:** Due On Receipt

**DESCRIPTION OF WORK**

Per Devin,

I arrived on site and began by checking the area of concern, I then checked the city water meter to see if there was any movement the meter was reading 0.00 gpm, I then shut the water meter off and performed a pressure test on the system after the pressure test I was able to determine there are currently no active domestic water leaks. I found the window has several cracks around it using the moisture meter I was able to determine the cause of water is coming from the window I would recommend re sealing the window as well as contacting a water restoration company to properly dry out the area. A pressure test will be charged.
