

Humanitarian Aid

Humanitarian aid is provided to those who require life sustaining assistance at a time when they are fleeing war or political persecution, in the midst of a community ravaging disease, experiencing unusual flooding or gathering together to receive aid in order to survive famine or other live threatening forces. Many people would die if humanitarian aid were not provided. Provision of adequate supplies of safe water is an integral part of humanitarian aid. Treatment of some of this water to a quality safe for human consumption is essential.

How can the **CABIN** 'Clean Water Filter' help?

- Reduce the dependency on bottled water as quickly as possible.
 - One case of bottled water is approximately the same size and weight of one **CABIN** 'Clean Water Filter'.
 - One **CABIN** 'Clean Water Filter' can produce the equivalent of one case of bottled water every hour from most available water supplies.
- The **CABIN** 'Clean Water Filter' can be distributed through affected communities and immediately reduce dependence on bottled water.
- The **CABIN** 'Clean Water Filter' can be shipped in 20-foot shipping containers each holding 800 filters complete with media (approximately 1,200 without media) or 40-foot shipping containers each holding 1,500 filters complete with media (or 2,400 without media). Note that it may be possible to source media at destination.
- The **CABIN** 'Clean Water Filter' can remain within the community as a legacy – a contribution to community development.

Advantages of the **CABIN** 'Clean Water Filter' include:

- Proven technology.
- Production of large amounts of safe water in a short time period.
- Compact and light weight. Easily transported and distributed.
- Rugged.

- Unlimited shelf-life. Efficacy of unused filter does not decrease with time.
- Simple to use and maintain correctly.
- Very little or no maintenance.
- No chemicals.
- No need for electricity.
- Inexpensive.

A major advantage is the ability of the community, a local agency or even a small or large scale business to provide long term continued support for the filter technology without continued assistance from NGOs or other agencies providing aid.
