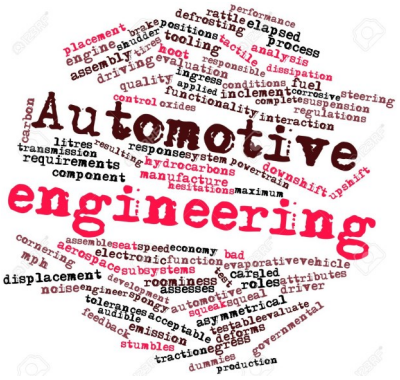
Value: 1 GCSE equivalent at grade 3 or lower (Level 1)

Assessment: 60% Portfolio of evidence, 40% multiple choice test

Revision Guide: NA

Available Places: The number of students will be capped at 16



What will you learn and how will you use it?

This qualification will allow students to:

- Develop work-related skills in the area of automotive studies
- Develop generic employability skills
- Prepare for further training with the automotive sector
- Gain an insight into the core activities within the automotive sector in order to make informed career decisions in the future
- Apply literacy, numeracy and scientific knowledge

During this course, students will combine theory learning with practical tasks working on vehicles and will also have the opportunity to work with a local garage.

Who should consider this qualification?

This qualification is aimed at students who are interested in a career in the automotive industry. The overall aim is to provide a basic level of knowledge and skill to start a career working within the sector or to pursue further relevant educational qualifications.

Students who engage with this course must be able to work reliably and safely within a potentially hazardous environment and be able to follow and act on instruction to complete tasks successfully.

What further study can you go on to after completing the course?

Numerous Level 2 and 3 qualifications are available for future progression including vehicle fitting, vehicle maintenance and repair, vehicle body and paint operations, roadside assistance and recovery, vehicle parts operations and vehicle sales.

This qualification provides an idea entry point for apprenticeship opportunities.

What are the employment opportunities from following this course?

As a Level 1 course, this qualification best leads on to further education in the automotive sector but some direct employment or apprenticeship opportunities may be available.

For more details about the please talk to Mr Down.
