### **What will you learn and how will you use it?**

What skills will be developed – Plenty of opportunities to learn new skills such as modern computer based mapping (called GIS), map skills, interpreting photographs, fieldwork skills (learning outside the classroom), presenting, independent learning, communication skills, role play and debating techniques.

You will also improve your literacy through your report writing and written work and make practical use of your numeracy skills when you interpret data and construct graphs.

Students will study: **Living with the physical environment;** The challenge of natural hazards, The living world, Physical landscapes in the UK. **Challenges in the human environment;** Urban issues and challenges, The changing economic world, The challenge of resource management, Geographical applications. **Fieldwork** (two geographical enquiries, one physical and one human). **Geographical skills.**

### **Who should consider GCSE Geography?**

Open to students of all abilities.

### **What further study can you go on to after completing the course?**

This is a subject that will allow you to follow any A Level, degree course or career path. Choosing Geography will keep your options open and help you in whatever you wish to do in the future.

### **What are the employment opportunities from following this course?**

GCSE Geography could lead to future careers in: Travel consultancy, cartography, energy engineering, town planning, geology, architecture, landscape architecture, meteorology, environmental science, tourism, nature conservation, seismology, forestry, housing management, merchant navy, airline work, oceanography, waste management, land surveying, hydrology, logistics etc.
