ACCELUS CLINICAL EDUCATION Hands-On Cadaveric Courses

Accelus is dedicated to positive clinical outcomes for our surgeon customers and their patients. Accelus Clinical Education (ACE) is our robust educational platform designed to deliver didactic and hands-on cadaveric training on emerging technology and advanced techniques using our innovative implants and instrumentation.

In each session, attendees will work closely with a faculty of respected spine surgeons who will proctor the course and provide direct peer-to-peer, hands-on experience with Accelus products, review cases, and discuss current trends and topics in spine surgery.

Courses will be delivered at the Accelus Surgeon Education Center in Palm Beach Gardens, FL, or at satellite facilities across the country.

“

The Accelus headquarters is a well-equipped, state-of-the-art facility that runs efficiently. Even more impressive than the facility itself, however, is the group of highly motivated individuals who work at Accelus. They are passionate about what they do, and their excitement is evident in the quality products they produce.

”
