

Zaniez Announces Updated Launch Timeline Aligned with Public School Schedule and Introduces Summer Soft Launch Initiatives

FOR IMMEDIATE RELEASE

Wittmann, AZ – January 22, 2026

Zaniez, revolutionary farm-based trade school dedicated to supporting autism spectrum families, based in Wittmann, Arizona, announces a strategic shift in its launch timeline to better synchronize with the public school calendar. Originally planned for Jan 2026, the full launch has been rescheduled to Aug 2026, ensuring a smoother integration for families and students transitioning from traditional schooling environments.

To build momentum and community engagement ahead of the official rollout, Zaniez will initiate a soft launch in Summer 2026. This phase will feature a specialized summer trade school program designed for parents with children currently enrolled in public schools who are exploring Zaniez as a permanent educational alternative. The program aims to provide hands-on experiences and insights into Zaniez's unique approach, helping families make informed decisions about long-term enrollment. Complementing this, Zaniez will host a series of summer autism spectrum disorder community events to introduce its mission and offerings to the broader Wittmann area, fostering connections and excitement among residents and the community at large.

The August 2026 launch will encompass comprehensive programming for all ages 18 and under, delivering tailored educational opportunities that emphasize creativity, practical skills, and holistic development. Building on this foundation, Zaniez will proceed with the resumption of its adult work study program, set for a Winter 2026 introduction, which will extend the organization's impact to lifelong learners seeking vocational and professional growth.

As Zaniez continues to prepare for these milestones, the organization is actively seeking donations to fulfill its initial fundraising goal of \$500,000. These funds are critical for equipping facilities, developing curricula, and ensuring accessible programming for all participants. Supporters are invited to visit www.ZaniezKids.com to learn more about the initiative and contribute to shaping the future of special education in Arizona.

About Zaniez: Zaniez is dedicated to providing innovative, community-driven educational experiences for children, youth, and adults, with a focus on trade skills, creativity, and real-world application through its programs at www.ZaniezKids.com.
