

ZANY ACTIVITY BASED ED

Zaniez adopts the concept of Activity Based Learning that offers a homelike, diverse environment with specialized education (S2C) and various options for learning in an exciting environment that includes outside the box thinking and classrooms that combine activity and learning versus solely desk or table learning. It engages the entire body while learning and includes learning by doing such as counting pedals on a flower, popcorn pieces in a bucket, number of jumps on a trampoline or crab walks on a gym mat, chips in a cookie recipe and so many more extraordinary ways to learn by doing.

Music and art programs have vanished from many educational and learning environments, which is detrimental to learning and personal growth. Zaniez integrates music and art daily, we believe in a classical music approach to daily learning that includes a grand piano for Spectrum kiddos that are naturally musically inclined as well as art easels for our little Picassos and Monets.

Imagine if the brilliant Zaniez minds were left to fend for themselves in traditional educational and learning environments to be predestined to a life without achieving personal greatness through the gifts bestowed to them by God.

Zaniez is committed to unearthing the brilliance and developing it to be sustained by the student over their lifetime of success!
