

THE ZANY TRUTH

Every daycare worker, preschool teacher and public school educator that we encountered created an IEP or some other document full of goals to "normalize" our child on the Spectrum neglecting to see the beauty within him as he is today and to build upon his natural talents. Zaniez was created to foster the brilliance inside children on the Spectrum and to find ways to build upon what is already there for lifelong success in every discipline to include music, art, math, technology, cooking, gardening, sports, and more!

We envision beginning with kiddos that are age 3 to age 10 approximately in a revolutionary school setting that doesn't conform to traditional norms. When ready, we will expand to include students of all ages and of all interest plus, provide a pathway to direct advancement into the chosen pathway. Once we master the more formal program and requirements, we will build up from there through elementary school to middle school and so forth with a trade school, business formation environment for both children and adults plus after school educational programs.

Mentorships, internships and apprentices will be encouraged for the high school students when ready to transition them into a career to foster independence and independent living. We have a plan to work with science, gaming, video production and technology leaders to create conduits for our brilliant minds to land.
