

# Alma TED™

## FAQ's:

- **What is Alma Ted?**  
*Alma Ted is a revolutionary, non-invasive treatment. When used with a topical hair care formula, it promotes improved blood flow to the scalp which results in thicker, stronger hair.*
- **How does it work?**  
*Alma Ted is an ultrasound-based system that leverages acoustic sound waves to promote improved blood flow to the treatment area.*
- **Who is a good candidate?**  
*Individuals that are suffering from hair loss or that want to improve the overall thickness and appearance of their hair.*
- **How many treatments are required?**  
*During your consultation your provider will assess your hair to personalize a treatment plan for you. Best results are typically seen after 3 treatments, spaced 1 month apart. Although noticeable improvements may be seen after 2 weeks.*
- **How long does each treatment take?**  
*This will vary based on your personalized treatment plan recommended by your provider. Average treatment time takes 20-25 minutes.*
- **Does it hurt?**  
*The Alma Ted is a pain-free treatment. You can expect to feel a warm sensation from the device and a ringing sound through the course of the treatment, but there is no pain involved. No needles, no discomfort. No trauma to the scalp.*
- **What is the downtime?** *No downtime.*
