🧱 Natural Building Workshop Recap 🧱

What a beautiful weekend of building, learning, and community! Thank you to everyone who joined us for our Natural Building Workshop with Abudu. Together we mixed earth, plastered walls, got our hands dirty, shared stories, and made meaningful progress on our future water sanctuary.

One of the highlights was experimenting with oyster shell shingles, embedding them into the cob as both a protective finish layer and a beautiful decorative

element. It was inspiring to explore how natural and reclaimed materials can be transformed into something both functional and artful.

We're so grateful to everyone who showed up with open hearts and willing hands. Every handful of cob and every layer of plaster brought this shared vision a little closer to life.

A heartfelt thank you to Abudu for sharing his knowledge and guiding us through the timeless craft of natural building. We can't wait to continue building —together.

🌿 Until next time!

"It was a great pleasure to be in the room with so many inspiring practitioners, advocates and researchers to talk strategy and action steps regarding valley-wide landscape hydration. There is vast potential for decentralized watershed-wide restoration to positively impact on Ojai's climate. Thanks to Didi and Alpha and their team to bringing us together. # Restore the springs of Ojai # rehydrate the west

Mr. Peacock

🌿 In Memory of Our Neighbor Peacock

This past month, we said goodbye to a beloved visitor who brought so much beauty and joy to the farm. Our neighbor's peacock was always a welcome sight, wandering beneath the walnut trees with quiet confidence and reminding us of the simple magic of sharing this land.

We'll miss his colorful presence and the moments of wonder he inspired. Rest well, beautiful friend.

Hope to see you at the farm soon!
