

Cat's Claw "5000"

VistaLife™ Cat's Claw "5000" is a natural extract of the highest quality inner bark of authentic *Uncaria tomentosa*, an exciting herbal discovery from the Peruvian Rainforest. Also called Una de Gato, it has been used for hundreds of years by the native Ashanica Indians. VistaLife™ Cat's Claw "5000" is a concentrated water and alcohol extract standardized to contain a minimum of 3% Total Alkaloids (calculated as Mitraphylline) and 15% Total Polyphenols.

Cat's Claw has only recently begun to be the subject of serious scientific study, but initial results of recent studies performed in Asia, Europe and North America are promising, indicating that the herb actually reduces inflammation, stimulates the immune system, kills viruses, and helps protect against heart disease.

It has been used in traditional South American medicine for many years to aid in the treatment of infections, joint pain, and gastrointestinal disorders. Cat's Claw may help detoxify the intestinal tract and replenish friendly bacteria in the intestines, which, along with its anti-inflammatory and immune-boosting effects, can be helpful to those suffering from some gastrointestinal disorders, particularly those caused by inflammation.

Cat's Claw is a proven anti-inflammatory. Numerous studies have shown that Cat's Claw stimulates white blood cells to fight infection, and one Italian study showed that cat's claw actually reduced the ability of two viruses to cause infection. Cat's Claw also contains sterols, which are chemical compounds that act like steroids in the body, which seem to support the traditional use of Cat's Claw to help joint pain. In studies of animals given Cat's Claw, they have found that this herb reduces swelling by approximately 50 percent.

One study performed at Shanghai College of Traditional Chinese found that Cat's Claw reduced cholesterol and blood pressure, and helped inhibit the formation of arterial plaque deposits and blood clots that trigger heart attacks and most strokes. Initial studies at the National Cancer Institute found evidence of Cat's Claw's anti-tumor effects. Cat's Claw may also help cancer patients by improving the outcomes of chemotherapy. It's been theorized that Cat's Claw's immune-boosting and antioxidant properties could help the body eliminate toxins caused by chemotherapy and radiation.

Supplement Facts		
Serving Size 1 caps.		
	Amount Per Serving	% Daily Value
Cat's Claw (<i>Uncaria tomentosa</i>) (Inner Bark)	334 mg*	
(15:1 Standardized Extract equivalent to 5,000 mg)		
* Percent Daily Values are based on 2,000 calorie diet.		
† Daily Value not established.
