

Free Your Team from Credentialing Chaos

The Challenge: Credentialing Overload

Your reps are hired to build relationships and drive growth — not to manage endless credentialing updates across Intellicentrics, Vendormate, Green Security, Symplr, and more. Each portal has unique requirements, policies, and deadlines that keep your team buried in admin work instead of engaging with customers.

The Impact on Sales Performance

Every hour spent updating credentials or chasing compliance deadlines is an hour lost in the field. Missed updates can mean lost hospital access — delaying sales opportunities and damaging customer relationships.

The RepClear Solution

RepClear takes on the credentialing process for your entire team — across every platform, for every hospital. We ensure your reps stay compliant, up to date, and ready to engage with customers. You get more time in front of clients and fewer interruptions.

The Results

- ✓ Reps spend more time selling, not logging in.
- ✓ Reduced compliance risk and credentialing delays.
- ✓ Centralized oversight without added workload.
- ✓ Improved field productivity and morale.
