

Care & Maintenance of Natural Stone

The most common concern most people express when buying natural stone is related to care and maintenance. Natural stone requires about the same level of care or less than most other counter-top or flooring materials. After we install your new stone we will apply an industrial impregnator sealer. This will protect your countertops from moisture or stains for 1 year before it will need to be re-applied. If you don't feel comfortable servicing your own counter-tops, call us to set up an appointment and we can schedule a Frye technician to re-seal.

Any Heating Appliance, such as crockpots, air fryers, etc. **require** a trivet.

For daily cleaning we suggest using a mixture of warm water, mild dish soap, and a non-abrasive sponge or soft cloth.
