Caring for your Quartz Counter Tops

Daily cleaning is simple!

Warm water with a soft cloth and mild soap is all you need.

For tough spots, use a mild pH cleaner and a non-abrasive sponge.

Be sure to rinse thoroughly after cleaning.

- Non-porous - Safe for food preparation
- Quartz will never need to be sealed
- Scratch Resistant, though a cutting board is always recommended
- Any Heating Appliance, such as crockpots, air fryers, etc. **require** a trivet.

If you have a spot that is difficult to remove, call Frye Granite, LLC.

Though resistant to most daily use, Quartz is **NOT** impervious to damage.

Do **NOT** use the following on your Quartz countertops:

- ⊗ **Bleach**
- ⊗ **Oven Cleaners**
- ⊗ **Paint Thinner**
- ⊗ **Tarnish Remover**
- ⊗ **Floor Stripper**
- ⊗ **Drain Products**
