Clear Visibility

for License Management
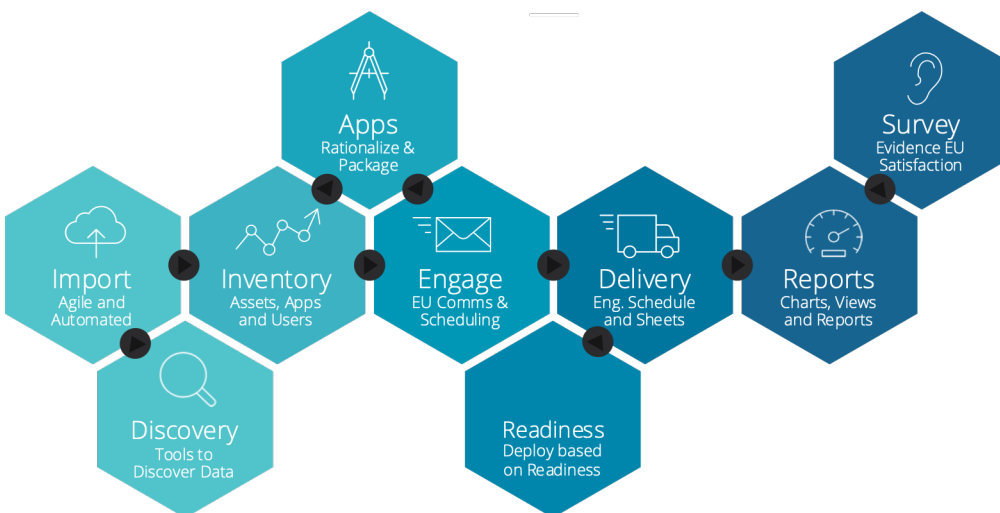

CLEARVISIBILITY

Gain simple and user-friendly visibility of your software assets

Visibility of the IT estate is fundamental to effective software management and by having an accurate view of software installation will help establish the as-is license position and provide vital business intelligence to help maximise software usage.

Good software asset management practices with Clear Visibility will facilitate continuous optimisation of licenses and fees allowing organisations to cut spending by removing unwanted software, reducing inactive licenses and avoiding unnecessary software purchases.

Clear Visibility supports managing moves and changes, budgeting, asset tracking and inventory management and delivers immediate results to optimise software for finance, legal, procurement, security and governance.

- Agentless data capture

- Control lifecycle costs across the PC or SaaS estate

- Licence Compliance through evidencing what is not compliant

- Fast set up process with easy to understand results

- Maximise value / ROI on all software assets both on-premise and in the cloud
