

Clear Visibility

for the Modern Workplace

CLEARVISIBILITY

Reduce end-user costs and gain compliance

IT teams and business leaders require end-to-end visibility across both on-premises and cloud, so they can optimise spend, maximise value and minimise the risks of audits, legal or reputational damage, software true-ups, contract, regulatory, policy and license compliance.

Industry research estimates that organisations can save approximately 30% of their software spend by continuously eliminating waste and underutilisation of software and hardware assets.

"Clear Visibility delivered a **300% increase** in the PCs delivered per engineer"

EUC Specialist - Major UK Car Manufacturer

Clear Visibility is designed to report and optimise the IT estate through advanced analytics and reporting for IT, Finance and Legal with simple and complete end to end user and asset management intelligence and automation by continuously analysing and identifying gaps using measurement tools based on industry standards to deliver your complete Asset Management solution.

- Simple end to end user and SW/HW asset management
- Application Readiness, packaging, security and governance
- Non-obtrusive notifications for users and application owners
- Manage migration to Windows 10 / 11 or VDI / DaaS
- Help achieve compliance for Cyber Security / DR / Criticality / ISO 27002 / PCI

De-Risk Projects

Use well established policies, processes, tools and techniques

Maturity Matrix

Identify gaps using measurement tool based on industry standards

Satisfaction

Help to ensure an excellent End-User experience and satisfaction

Evergreen Deployment

Empowers deployment as continuous Business As Usual activity

Productivity

Significant increase in productivity
