

AMBR Consulting

Change | Communications | Coaching | Training

About us

We are a Change Management and Training Consultancy, supporting organisations across the UK to achieve their goals and objectives.

We are passionate about change and training and the transformative effect it can have on organisations and their people. Our goal is to help organisations deliver successful, long-term organisational change and development.

We are an accredited ITOL training centre, meaning we deliver certified training interventions that have been globally benchmarked against international standards. Quality is central to how we operate and the support we deliver.

ITOL
INSTITUTE OF TRAINING &
OCCUPATIONAL LEARNING

Our wide-ranging portfolio of change and training services enables our clients to think and work differently; delivering, adopting and embedding change to realise business benefits in complex and challenging environments.

Be ready for tomorrow with AMBR Change Management

Change is something all organisations consistently face. Our strength is helping organisations to articulate that change in a meaningful way and partnering with them to ready their people for implementation. Ultimately, driving higher rates of business adoption and return on investment, as we all know change can be a costly undertaking.

How do we do this?

Our approach to change is simple but effective and has been refined over many years and multiple clients.

- 1 We build the strategy.
- 2 We align leadership.
- 3 We engage the business.
- 4 We build the skills to succeed.
- 5 We implement.
- 6 We continually measure and adjust.

Our experienced change practitioners deliver the following services to ensure successful change implementations:

Change Health Checks:

our detailed health checks and action plans ensure that your delivery is structured and prepared for implementation. Our checks focus on core activities and provide practical tips and instruction to enhance success and build leadership confidence.

Consultancy and Coaching:

we bring our experience and expertise to your programme, providing knowledgeable consultants and dedicated support to partner with your existing team or lead change management interventions.

Bringing development to life

Our passion for creative and interactive learning makes us perfectly placed to support you with all your training and development needs. We partner with our clients to deliver effective and measurable solutions that ensure knowledge and competence is embedded in the organisation through its people.

Our Training Offer:

Leadership and Management

Boost the leadership skills within your organisation and create a high-performing management and leadership team.

Team Building

Whether you have a new or established team, exploring and enhancing how your team works together allows you to break down communication barriers, build confidence and generate successful outcomes.

Change Management

Build change management competence within your organisation with change management training for both change professionals and leadership teams.

DISC Flow Profiling

Understand your personal communications style and preference using DISC flow profiling. This highly engaging and interactive learning can be completed as an individual or as part of a team session.

Make an impact with e-learning

Our design team, work with clients to develop bespoke e-learning packages that enable learners to access development materials at their convenience. Classroom learning isn't for everyone and giving your people the opportunity to create their own learning environment and access high-quality engaging materials is becoming more important when creating organisational development strategies.

It is important to us, that e-learning moves from the traditional compliance click through modules to engaging, well designed and beautiful content that learners can feel a part of. We achieve this using mixed media, gamification, and animation to enhance the learner's journey.

We also understand the importance of evidence-based learning, building quality measures and metrics to help your organisation make informed decisions about future learning design.
