WHY PARTICIPATE

Four Reasons to Join Us Now

Jervis – on the Britannia trend. A VMS-style Cu-Zn-Ag-Au project 55 km northwest of the Britannia Mine, once the largest copper mine in the British Commonwealth, with a coherent 2 km anomaly identified.

Our team is invested. Our proven team, with world-class discoveries behind it, holds approximately 75% of issued stock.

A tight share structure. 56,400,014 shares fully diluted and a market cap of about $4.6 million, with dilution minimized through the downturn.

A near-term catalyst. Exploration including drilling is planned on Jervis for Q1 – Q2 2027.
