Company is Capitalizing on the Junior Exploration Mining Sector-Upturn

An Upturn in the Junior Mining-Sector Now Gaining Momentum

ABOUT THE COMPANY

AsiaBaseMetals Inc. (**TSX.V**: ABZ) (the "**Company**"), a Futura Capital Group company, is a mineral exploration and development company advancing highly prospective Jervis Project (copper zinc silver and gold volcanogenic massive sulphide - VMS-Style) and the highly prospective Gnome Project (zinc/cobalt) in British Columbia, Canada. The Company's proven team (the "Team") is also targeting stable jurisdictions across the Americas for additional acquisitions.

Team comprises Management, Board of Directors and Advisory Board

PROVEN TEAM

A Proven Track-Record of Discovery and Value Creation

AsiaBaseMetals is anchored by a Team with a proven track record of discoveries, development, production, and value creation. See Team's Accomplishments – World-Class Discoveries – Page 2

The Team includes a member recognized with the **2009** Thayer Lindsley Award and the **2015** Colin Spence Award, both for International Discovery, for contributions to Alaska's giant Donlin Gold deposit and high-grade Bornite Copper deposit.

AWARDS GRANTED TO TEAM MEMBER

2009 Thayer Lindsley Award **
Joe Piekenbrock – International Discovery
Team Member - Advisory Board

2015 Colin Spence Award **
Joe Piekenbrock – International Discovery
Team Member - Advisory Board

**** For contributions to Alaska's giant Donlin Gold deposit and the high-grade Bornite copper deposit.**

MARKET OUTLOOK

Why Copper - Why Now

DEMAND IS STRONG AND RISING

- Population and middle-class growth, led by India and China
- Electrification and AI-driven power demand
- Replacing aging infrastructure in developed economies
- Trade and tariff pressures on the movement of metals

SUPPLY IS DEPLETED AND CONSTRAINED

- A long-running shortage of new discoveries
- Multi-year lead times and permitting hurdles to bring new mines online

FEATURED PROJECT - BRITISH COLUMBIA, CANADA

Jervis Project: The Next World-Class Discovery?

Another Britannia? Proven Team Will Explore and Find the Answer - Exceptional Opportunity

BRITANNIA MINE VIDEO

JERVIS PROJECT VIDEO

Jervis Project **(100% owned – VMS-Style)** sits 55 km northwest of, and on trend with, the Britannia Mine, within the VMS-prospective geological trend of the Gambier Group rocks. The same trend hosts the Rox project, 20 km northwest of Jervis Project, held presently by project generator Kenorland Minerals Ltd. (TSX.V: KLD).

The project is about 80 km northwest of Vancouver , B.C., Canada, and 11 km north of Egmont on the Sunshine Coast, within the traditional territory of the Shíshálh First Nation.

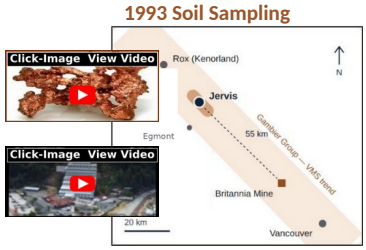

Mineral Claims Consultation Framework (MCCF) Complete

One claim was granted on December 5, 2025, and the second on July 22, 2026, completing the MCCF framework for the whole Project.

Coherent 2 km mineralized anomaly identified.

In a broad NW–SE band on trend with Britannia

1993 Soil Sampling

Note: Schematic; positions approximate. Location and geological setting along the Gambier Group trend.

JERVIS PROJECT ---------- Gambier Group Rocks Trend -------- BRITANNIA MINE

Jervis Project on Trend with Britannia Mine - Once One of The World's Largest Copper Mines in the World

Britannia Mine - Largest Copper Mine in The British Commonwealth - 70-Year Mine-Life now a museum.

Project Name	Copper (Cu)	Zinc (Zn)	Silver (Ag)	Gold (Au)
Jervis Sampling Highs	1.92%	24.9%	283 g/t	N/A
Britannia Production Grade	1.1%	0.65%	6.8 g/t	0.6 g/t

Note: Mineralization on adjacent or nearby properties is not necessarily indicative of mineralization on the Jervis Project.(See Cautionary Disclaimer on website)

Qualified Person: Technical information reviewed and approved by Helgi Sigurgeirson, P. Geo., a Qualified Person under NI 43-101. The 1993 soil sampling and Jervis sampling highs are historical results not independently verified by the Company.

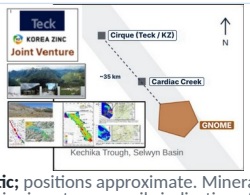

EXCEPTIONAL ZINC/COBALT PROJECT - BRITISH COLUMBIA, CANADA

Gnome Project

Another Cirque and Akie? Proven Team Will Find the Answer - Exceptional Opportunity

Gnome Project (100% owned – Zn/Co Project 1,800 Hectares) is strategically located in the Kechika Trough of the regionally extensive Selwyn Basin, a district that hosts several significant deposits. It lies about 35 km southeast of the Cirque deposit (a 50/50 Teck / Korea Zinc joint venture) and near ZincX Resources' Cardiac Creek deposit.

The Company plans to advance Gnome Project exploration prudently, guided by the permitting timeline for mining permits on the adjacent Cirque and Cardiac Creek projects.

Note: Schematic; positions approximate. Mineralization on nearby properties is not necessarily indicative of mineralization on Gnome.

CAUTIONARY DISCLAIMER & FORWARD-LOOKING STATEMENTS **This is a condensed summary; the complete legal information and cautionary disclaimer is available in the company's website (for Full-Readability), and forms part of this document.** This document is not directed to, or intended for distribution to or use by, any person or entity that is a citizen or resident or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would require any registration or licensing within such jurisdiction. this presentation does not constitute or form a part of, and should not be construed as an offer, solicitation or invitation to subscribe for, underwrite or otherwise acquire, any securities of the Company, nor shall it or any part of it form the basis of or be relied on in connection with any contract or commitment whatsoever.

Forward-Looking Statements. This document contains forward-looking information within the meaning of Canadian securities laws — including statements about asset acquisitions, financing and use of proceeds, exploration and development plans, and potential mineralization. such statements are not guarantees; actual results may differ materially due to risks including failure to obtain exchange or regulatory approvals, failure to raise funds on the proposed terms or at all, mineral-exploration risk, commodity-price and currency fluctuations, permitting and environmental requirements, and other factors. Readers should not place undue reliance on forward-looking statements. the company disclaims any obligation to update them except as required by law.

Technical Information. Mr. Helgi Sigurgeirson, a consultant to the company, is a qualified person under national instrument 43-101 (NI 43-101) and has reviewed and approved the scientific and technical information herein. historical results referenced are non-compliant with NI 43-101; a qualified person has not done sufficient work to classify them as current mineral resources or reserves, and they are not treated as such. information on adjacent or nearby properties is not necessarily indicative of mineralization on the company's projects.

Notice. neither the TSX Venture Exchange nor its regulation services provider accepts responsibility for the adequacy or accuracy of this material. this material does not represent an offer or recommendation to buy or sell securities and is not a solicitation for financing.
