Company's Business Mining Sector

AsiaBaseMetals Inc. ("Mantra" and/or "AsiaBaseMetals Exploration" and/or the "Company") is focused in the Mining sector for value driven projects/assets; globally, with emphasis in the America's.. The Company is led by an accomplished, successful, and entrepreneurial business and mining team (see Pages 4 - 6) operating under high standards of business conduct & ethics (see page 14) to build shareholder value.

Advancing Current Project

The Company is advancing its current 100% owned Gnome project ("Gnome Project" - Cobalt/Zinc) located in world-class mining district in Canada, one of the safest and mining friendly jurisdictions in the world. (see Page 8 – for details)

(see Appendix D – Page 35 for Larger-Image)

Diversifying & Acquiring Assets

The Company is continuing to diversify its asset portfolio via timely value-driven project acquisitions. The Company is reviewing advanced projects for precious metals (Gold & Silver), base metals (Copper), and other resources in the current cyclical commodity markets down-turn to cease and participate in the exceptionally favorable upcoming market conditions for mineral resources; as expected and predicted by the market.

Diversification - Global Reach - Safe & Mining Friendly Jurisdictions

Company's Featured Project **Gnome Zinc/Cobalt Project**

Gnome Zinc/Cobalt Project

AsiaBaseMetals Inc.'s 100% owned Gnome project ("**Gnome Project**"), a Cobalt-Zinc project encompassing four mineral claims (1996 hectares) in the heart of an area that is home to both the Cirque and the Cardiac Creek Deposits, is located 35 kilometers SE along trend from Teck Resources Limited ("**Teck**") & Korea Zinc's joint ventured ("**T-KZ-JV**" - **50% each**) Cirque deposit ("**Cirque Deposit**") and 15 kilometers south east from ZincX Resources Inc. ("**ZincX**") the Cardiac Creek deposit ("**Cardiac Creek Deposit**"). The Cirque Deposit, the Cardiac Creek Deposit, Pie, Cirque East and Youen properties, the Cirque Property and the Gnome property are all in the same geological belt, NE of Williston Lake, in northwestern British Columbia, Canada, within a north-northwest-south-southeast-oriented geological trend in the southernmost part the Kechika trough (the "**Kechika Trough**") of the regionally extensive Paleozoic Selwyn basin (the "**Selwyn Basin**"). The Selwyn basin is already recognized as one of the most prolific sedimentary basins in the world for the occurrence of sedex zinc-lead-silver and strataform barite deposits discovered in the heyday of northern B.C., Canada, Pb-Zn-Ag exploration (late 1970's and early 1980's). (For details see: [Appendix-A](#))

The Gnome's Exploration Work Program carried out in 2018 & 2019, included:

- Discovery of Cobalt (Co)
- First cobalt in the region, together with Zinc
- Anomalous Cobalt (0.58% Co) together with Zinc (up to 5.99% Zn) and Manganese (up to 10.6% Mn)
- Shallow drilling (one hole – 140 m)

NOTE: Technical Reports have been prepared for the Project

- **NI-43-101 Technical Report - Dated Nov 10, 2022**
(Andrew Tims P. Geo)

Discovery of Cobalt (Co) - Gnome Project

First in the region, together with Zinc.

Soil Geochemical Survey Results - 2018

Anomalous Cobalt (0.58% Co) together with Zinc (up to 5.99% Zn) and Manganese (up to 10.6% Mn)

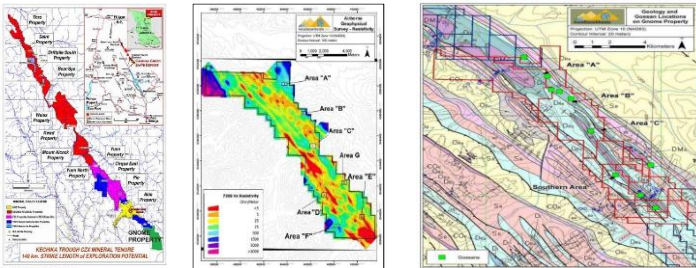

Cobalt (Co)	Zinc (Zn)	Manganese (Mn)	Nickel (Ni)	Iron (Fe)
0.58%	5.99%	10.62%	0.8%	58.4%

AsiaBaseMetals Inc.

[Note: Please see Disclaimer & Cautionary Note / Notice to Reader – Applicable to whole document – \(Attached\)](#)

Company's Featured Project **Gnome Zinc/Cobalt Project** *continued*

Future Drilling: With all deposits in the region having been discovered only through deep drilling (350m or more), and since comparatively the Gnome property slopes down in elevation, the Company wanted to test the property only through a relatively shallow hole (140m). The Company intends to test the property through deeper drilling only when adjacent known deposits proceed towards build out to production.

(see Appendix D for Larger-Images)

Precious and Base Metals Market Demand Driven by Population Growth

The demand for precious base metals is increasing as the **population of the world, especially the middle-class population, is growing**. Further, the supply of the commodities being depleted is becoming more difficult to replace, especially with the environmental and permitting issues becoming more stringent.

Company's Future **Build Shareholder Value - Acquisition of Advanced Projects "Projects of Tomorrow"**

AsiaBaseMetals Inc.'s biggest asset and resource is its "Human Capital"; (the "TEAM"). The Company's TEAM consisting of individuals with an accomplished, successful, and entrepreneurial business and mining history is committed and dedicated to building "Shareholder Value", as it has consistently done, through discovering, acquiring, exploring, and developing the "Projects of Tomorrow".

Advance Current Projects & Acquire Value Driven Assets

The Company, while advancing its current project prudently, based on current market conditions, is continuing to diversify its asset portfolio via timely value-driven project acquisitions.

The Company is reviewing advanced projects for precious metals (**Gold & Silver**), base metals (**Copper**), and other resources in the current cyclical commodity markets down-turn to cease and participate in the exceptionally favorable upcoming market conditions for mineral resources; as generally expected and predicted by the market, likely resulting from the current and forecasted current global economic-environment and conditions.

Raj Chowdhry, CEO & Chairman stated:

"The Company's experienced and entrepreneurial team is excited as it continues to review advanced mining assets, both precious metals (Gold & Silver) and base metals (Copper) for acquisition with emphasis in the America's.

The recent cyclical commodity markets downturn provides an immense opportunity to acquire assets at exceptionally reasonable prices; an event and process that will allow the Company to advance the projects to production in time for the upcoming demand expected from the immensely favorable market conditions resulting especially from the forecasted economic recovery.

You can well imagine the opportunities the population growth, together with technological progress/change is likely to create for an exceptionally higher demand for the currently used minerals, especially Copper and Gold, and new minerals of the future with a higher percentage of the population joining the middle-class."

Code of Business Conduct & Ethics

Introduction - General Approved and adopted

AsiaBaseMetals Inc. including its subsidiaries (collectively "**AsiaBaseMetals Inc.**" or the "**Company**") is committed to conducting its business under the highest standards of Business Conduct and Ethics. As such, the Company's Board has approved and adopted a **Code of Business and Ethic Conduct (August 2009)**, and also approved & adopted an **Anti-Corruption Policy**.

The purpose of the Company's Code of Business Conduct and Ethics (the "**Code**") is to assist all Company personnel, being all directors, officers, employees, and consultants ("**Interested-Parties**") in making decisions regarding the affairs of the Company (including its subsidiaries).

The Code states basic principles that should guide the affairs of the Company and deals with certain specific situations but is not comprehensive. Personnel are encouraged to consult with the President for direction of specific issues on conflicts.

Highlights- Code of Business Conduct and Ethics

All directors, officers, employees, and consultants ("**Interested- Parties**") of the Company will comply with all obligations, which reaffirm the Company's high standards of business conduct, as set out in the Code of Business Conduct and Ethics (access Full Code of Business Conduct and Ethics is available on the Company's website).

ANTI-CORRPTION POLICY IN PLACE

The Company's Board of Directors Approved & Adopted an **Anti-Corruption-Policy** (August 22, 2018)

Compliance - Code of Business Conduct & Ethics

It is the responsibility of all Interested Parties to be aware of their obligations under and to comply with this Code. All breaches of this Code shall immediately be reported to the President. All reports by an individual of violations of this Code shall be kept confidential unless otherwise required by law. Individuals who breach this Code may be subject to disciplinary action including dismissal.

Contact us with your questions.

NOTE: Upon reading the complete **Code of Business Conduct and Ethics** (as provided in the Document Library of Company's **website**), If you have any questions about the Code or what is expected of our Interested Parties, please **contact us** for assistance

Attention of: "Company's President"

Company's Projects **Jean Iron-Ore Project** *continued*

Appendix – A *Continued*

Gnome Project

Key Highlights

Highlights of 2019 eight soil and 12 rock samples results from Area G:

Soil Sample Results – Highlights

- **Cobalt** (Co) values are in the range of 7.8 parts per million (ppm) to 858.5 ppm (0.08%) where seven samples are over 700 ppm Co.
- **Zinc** (Zn) values are from 268.2 ppm to 30,317 ppm (**3.03%**) Zn.
- **Manganese** (Mn) values are in the range of 531 ppm to 18,874 ppm (**1.88%**) Mn.
- **Iron** (Fe) is in the range of 1.52% to over 40% Fe.
- **Nickel** (Ni) values are in the range of 46.4 ppm to 5,144 ppm (**0.51%**) Ni.
- **Molybdenum** (Mo) is in the range of 20.07 ppm to 692.87 ppm (**0.069%**) Mo.

Rock Sample Results - Highlights

Grab rock samples results indicate:

- **Cobalt** values in the range of 0.8 ppm to 725.5 ppm (**0.07%**) Co
- **Zinc** 56.9 ppm to 17,707 ppm (**1.77%**) Zn,
- **Nickel** 1.9 ppm to 1,988.2 ppm (**0.19%**) Ni
- **Manganese** 22 ppm to over 12,653 ppm (**1.26%**) Mn
- **Iron** 0.28% to over **40%** Fe.

AsiaBaseMetals Inc.

[Note: Please see Disclaimer & Cautionary Note / Notice to Reader – Applicable to whole document – \(Attached\)](#)

Company's Projects **Jean Iron-Ore Project** *continued*

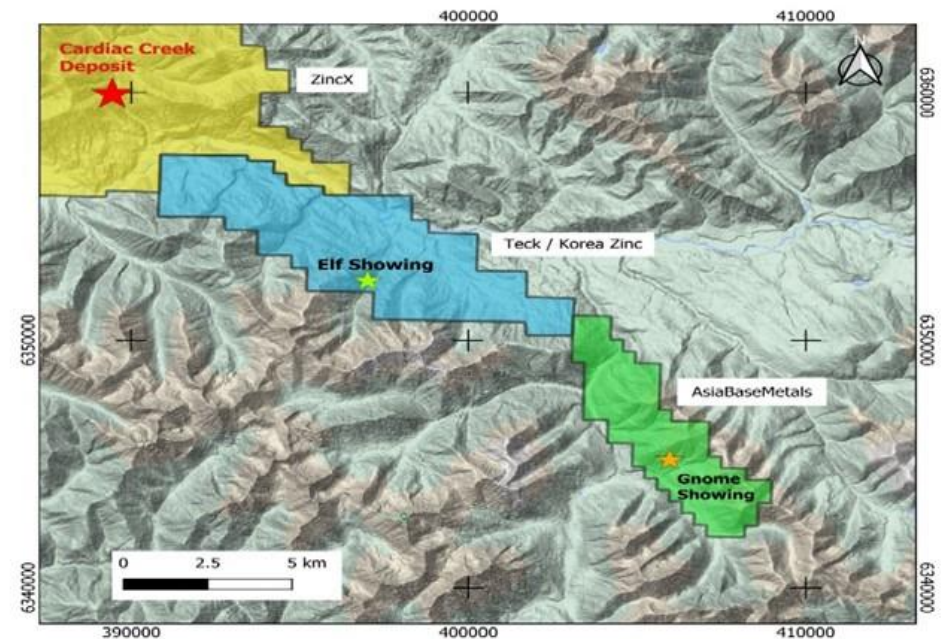

Appendix – A *Continued*

Gnome Project

Raj Chowdhry, Chairman & CEO stated, "Although the one shallow hole (140m) drilling results did not meet our expectations of identifying a shallow mineralization possibly amenable to open pit mining, the discovery of a new target area and the remaining targets in other areas identified to date on the Gnome property continue to present a good chance of a discovery for cobalt and zinc at shallow or deeper depths.

Further, having tested and reviewed the property, based on exploration work conducted, the Company on February 27, 2023, amalgamated the 11 claims (5,254 hectares) then held to 13 claims (5,289 hectares) and then on September 1, 2023, adjusted the original claims held through sub-divisions and amalgamations to reduce the total claims held from 13 claims (5,289 hectares) to four claims (1996 hectares) on September 1, 2023."

The Company intends to advance this project in congruence with infrastructure advancement in the area and market conditions.

AsiaBaseMetals Inc.

Company's Projects

Jean Iron-Ore Project *continued*

Appendix – A *Continued*

Significant Zinc properties in the Gnome Property area

Cardiac Creek Deposit - Akie Property - Now held 100% by ZincX Resources Inc.

- Indicated resource estimate (at 5% Zinc cut-off grade) of 22.7 million tonnes grading 8.32% zinc (4,162M Lbs), 1.61% lead (804 M Lbs) and 14.1 g/t silver (10.3 M Ozs)
- Inferred resource (at a 5% zinc cut-off grade) of 7.5 million tonnes grading 7.04% zinc (1,169 M Lbs) , 1.24% lead (205 M Lbs) and 12.0 g/t silver (2,9 M Ozs).

Pursuant to a NI-43-101 technical report prepared by Canada Zinc Metals Corp. with an effective date of May 16, 2016). The deposit remains open along strike and at depth. (Source: website – ZincX Resources Corp.) Further, pursuant to a **PEA** (see Note 1; below) announced on July 20, 2018 (filed on Sedar on August 2, 2018), ZincX reported the following information:

- **NPV** - Pre-Tax (discounted at 7%) **\$649 million** (\$401 million after tax);
- **IRR** - Pre-Tax (Internal Rate of Return) - **35%** (27% after-tax);
- **Payback Period** - Pre-Tax - **2.6 years** (3.2 years after-tax);
- **Mine-Life** - the PEA contemplates a **4,000 tonne-per-day** underground mine & 3,000 tonne-per-day concentrator with an **18 year mine life**;
- **Total Mine Production of 25.8 million tonnes**, of which 19.7 million tonnes are processed;
- **Initial capex** (excluding contingency) estimated at **\$256.7 million**, total of \$302.3 million, including \$45.7 million in contingency;
- **Cardiac Deposit remains open** at depth with potential to increase mine life;
- **District Potential** - Akie & Kechika regional combined **offer district-scale potential for new discoveries**;
- There is no certainty that the results concluded in the PEA will be realized.

AsiaBaseMetals Inc.

Note: Please see Disclaimer & Cautionary Note / Notice to Reader – Applicable to whole document – (Attached)

Company's Projects **Jean Iron-Ore Project** *continued*

Appendix – A *Continued*

Significant Zinc properties in the Gnome Property area - continued

Cirque Deposit - Now held 100% between Teck Resources Limited ("Teck") and Korea Zinc ("KZ") through a joint venture (T-KZ JV - 50% each); drilling delineated historical resource estimates for the North Cirque zone and the South Cirque zone. (Source: per historical data - The British Columbia Ministry of Energy and Mines MINFILE - Zinc in British Columbia; British Columbia Geological Survey – Information Circular 2015 - 12, Assessment report 34274, dated November 1, 2013).

Pie, Cirque East and Yuen Properties - Now held 51% between Teck Resources Limited ("Teck") and Korea Zinc ("KZ") through a joint venture (T-KZ JV - 50% each) and 49% by ZincX Resources Inc.

Note 1: *There can be no assurance that the Company will obtain similar results on the Gnome Property. The PEA is considered preliminary in nature and includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves. Mineral resources that are not mineral reserves have not yet demonstrated economic viability. Due to the uncertainty that may be attached to mineral resources, it cannot be assumed that all or any part of a mineral resource will be upgraded to mineral reserves. Therefore, there is no certainty that the results concluded in the PEA*

will be realized. Mineralization hosted on the Cirque and Cardiac Creek Properties is not indicative of the mineralization hosted on the Company's Gnome Zinc Project at its current stage of exploration.

Exploration History - in the area:

In December 1992, Curragh Resources, which had previously acquired Cirque, was issued a Mine Development Certificate (approval for construction) by the BC Government for a mine/mill complex with a daily milling rate of 3,500 tonnes.

Historic drilling delineated historical estimates of the North Cirque zone and South Cirque zone. Development of Cirque did not proceed and the property was subsequently acquired by Teck Corporation (25%), Cominco Limited (25%) and Korea Zinc Company (50%) under a joint venture (Sources: Assessment report 34274, dated November 1, 2013; Ministry of Energy and Mines MINFILE Number: 094F 008; website - Canada Zinc Metals Corp.)

Note: "Qualified Person" information is provided, as required by regulatory authorities, in the "Disclaimer" section of this website under the heading "Technical Information".

Company's Team Profiles

Appendix – C

Rajinder (Chowdhry (Raj)).

Director, Chairman & CEO

Mr. Chowdhry, the founder, Chairman and Chief Executive Officer of **Futura Capital Limited**, a private venture capital company, has invested in and raised funds for various projects around the world. Mr. Chowdhry, currently a director of various publicly listed companies, has over thirty-five (35) years' experience in the capital markets; being the founder, chairman, director, chief executive officer and president of several public companies trading on global Stock Exchanges including Stock Exchanges in the United States and Canada.

Founding Directorships, Chairmanships & CEO Roles (Present & Past):

- **America Mineral Fields Inc.** - One of the founding directors of America Mineral Fields Inc. [(Copper mining / production) name changed to Adastra Minerals Inc. and acquired in 2006 by First Quantum Minerals Ltd.]
- **Mountain Province Diamonds Inc. & Camphor Ventures Inc.** – One of the founding directors, Chairman and CEO of Camphor Ventures Inc. (Diamond exploration & mining / production), and a director of Mountain Province Diamonds Inc. (Diamond exploration & mining / production). Camphor and Mountain Province entered a business combination in 2007 to unify their existing joint venture with De Beers Canada, leading to commencement of diamond production in Canada in 2016.

Founding Directorships, Chairmanships & CEO Roles [Continued](#)

- **Tintina Resources Inc.** – One of the founding directors, Co-Chairman and CEO [(Copper mining/production - Black Butte Copper Project - Final Mine Operating Permit Granted - 2019 & Re-stated- 2024), name changed to Sandfire Resources America Inc.]
- **SolidusGold Inc.** – One of the founding directors, Co-Chairman, and CEO [(Copper Exploration), name changed to Valhalla Metals Inc.]
- **International Thunderbird Gaming Inc.** – One of the Founding directors, and Co-Chairman and (Casino Gaming operations).
- **Axion Communications Inc.** One of the founding director and Chairman and CEO. (Internet operations).
- **AsiaBaseMetals Inc.** -founding director, Chairman and CEO (Zinc/Cobalt exploration).
- **Mantra Pharma Inc., Mantra Exploration Inc., & Mantra 2 Real Estate Inc.** - The founding director, Chairman and CEO.

Mr. Chowdhry, a Chartered Professional Accountant (CPA, CA) received a Bachelor of Commerce (B. Comm.) degree from The University of British Columbia ("UBC"), Canada, and his designation as a Chartered Accountant (CA) from the Institute of Chartered Accountants of British Columbia, Canada. He is also a charter member of the Vancouver chapter of The INDUS Entrepreneurs (TIE).

Bruce Bragagnolo (Bruce)

Director

Mr. Bragagnolo is the Executive Chairman and a Director of **Regency Silver Corp.**, a Mexico focused gold-copper exploration company advancing its flagship wholly owned high grade Dios Padre gold-copper-silver project in Sonora, Mexico.

Bruce is the co-founder and former Chief Executive Officer of **Timmins Gold Corp.** (name changed to Alio Gold Inc. - 2017) which was a former +100,000 oz. per year gold producer. Alio Gold merged with Argonaut Gold (2020) and was acquired by Almos Gold (2024).

He is also the co-founder and the former CEO of Silvermex Resources Ltd., a silver explorer which was acquired by First Majestic Silver in 2011 for a market capitalization of \$175 million.

Mr. Bragagnolo's strategic planning, business development, administration and financing abilities were instrumental in structuring and raising over \$75 million in equity and debt for Timmins Gold (name changed to Alio Gold Inc.) and overseeing the growth of the company as it transitioned from junior developer to a gold producer with a peak market capitalization of over \$450 million.

Mr. Bragagnolo obtained a degree in law from the University of British Columbia and is a member of the Law Society of British Columbia.

Forward Looking Statements

This Material/Information (including website), including documents posted on this Material/Information (including website), contains forward-looking information within the meaning of Canadian

Disclaimer & Notice to Reader *Continued*

Forward Looking Statements *Continued*

securities laws (referred to as "forward-looking statements"). All statements other than statements of historical fact included in this Material/Information (including website), including, without limitation, any statements regarding the acquisition of assets (**including real estate, mineral projects, entering into the Cannabis Sector, possible Spin-Out transactions pursuant to a plan of arrangement**), the Company's financing efforts and the use of proceeds therefrom, exploration and development plans and other future plans and objectives of the Company and potential mineralization on mineral projects, if any, are forward-looking statements.

Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, identified by words or phrases such as "expects", "is expected", "anticipates", "believes", "plans", "projects", "estimates", "assumes", "intends", "strategy", "goals", "objectives", "potential", "possible" or variations thereof or stating that certain actions, events, conditions or results "may", "could", "would", "should", "might" or "will" be taken, occur or be achieved, or the negative of any of these terms and similar expressions) are not statements of historical fact and may be forward-looking statements.

There can be no assurance that such statements will prove to be accurate and actual results and future events may vary from those anticipated in such statements. Important risk factors that could cause actual results to differ materially from the Company's plans or expectations include failure to obtain Stock Exchange Approvals [Including the **TSX Venture Exchange (TSX.V Exchange)** or the **Canadian Stock Exchange (CSE Exchange)**] acceptance and other regulatory approvals required for proposed acquisition and financing transactions (collectively, "Transactions"), failure to remove conditions to completion of Transactions, failure to raise sufficient funds on the proposed terms or at all, risks associated with mineral exploration and development, including the risk that actual results of exploration and development will be different from those expected by management, the risk that potential mineralization, on mining projects, if any, will not be upgraded or verified, uncertainties involved in the interpretation of drilling results, if any, and geological tests, if any, and the estimation of mineral resources, if any, unanticipated variations in geological structures, if any, grades or recovery rates, if any, unexpected cost increases, risks related to mineral properties being subject to prior unregistered agreements, transfers or claims and other defects in title, if any, the risk that required cooperation of government agencies and other stakeholders in the development of the Company's properties will not be obtained, risks related to the need for reclamation activities on the Company's projects/properties and uncertainty of cost estimates related thereto, litigation risks, risks of operations such as accidents, fire, ground instability, flooding, labor disruption, equipment failure, metallurgical, environmental or other events that could delay or increase the cost of exploration or development, inadequate insurance or inability to obtain insurance and bad weather, non-compliance with environmental and permit requirements, fluctuations in metal prices and currency exchange rates, inability to procure equipment and supplies in sufficient quantities and on a timely basis and the other risks disclosed in this information/ material (including website) and the Company's other public disclosure. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. Readers should not place undue reliance on forward-looking statements.

The forward-looking statements were developed based on the assumptions and expectations of management, including that Stock Exchange (including **TSX Venture Exchange** or **CSE Exchange**) and other required approvals and financing for Transactions will be obtained, conditions will be satisfied, that the Company will be able to obtain any required government or other regulatory approvals and required financing to complete the Company's planned exploration and development activities, that the Company will be able to procure equipment and supplies in sufficient quantities and on a timely basis, that actual results of exploration activities will be consistent with management's expectations, that the assumptions underlying mineral resources estimates are valid, any proposed future development of the Company's mineral projects will be viable operationally and economically and proceed as expected, that no accident, fire, ground instability, flooding, labor disruption, equipment failure, metallurgical, environmental or other events that could delay or increase the cost of exploration or development will occur, the other assumptions disclosed in this website and the Company's other public disclosure and that the risks described above will not materialize.

There can be no assurance that proposed Transactions will complete. The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as otherwise required by applicable securities legislation.

Disclaimer & Notice to Reader *Continued*

Technical Information

Mr. Andrew Tims, consultant to the Company (for mining projects, when undertaken), is a Qualified Person for the purposes of National Instrument 43-101 and has reviewed and approved the information of a scientific and technical nature contained in Material/Information this website. **Mr. Andrew Tims** has reviewed, but has not verified, the historical resource report for properties held by companies referred to in this Material/Information (including website) website (defined below).

A qualified person has not done sufficient work to classify the historical estimate reported, if any, in the technical report, if any, regarding any properties/projects held by companies other than **Mantra** that are referred to in the Company's Material/Information (including website) 'as current mineral resources or mineral reserves and accordingly the Company is not treating it as a current estimate of mineral resources or reserves. However, the Company believes that the historical estimate is relevant and reliable, as it was prepared by a reputable mining company utilizing modern quality assurance program and quality control measures and drilling procedures or by other reputable and reliable entities.

Cautionary Note to U.S. Readers Concerning Mineralization Estimates: The estimates of mineralization shown, if any, in this information/ material (including website) have been prepared in accordance with the definition standards on mineral reserves of the Canadian Institute of Mining, Metallurgy and Petroleum referred to in Canadian National Instrument 43-101 Mineral Disclosure Standards ("NI 43-101"). The definitions of mineralization used in NI 43-101 differ from the definitions in U.S. Securities and Exchange Commission ("SEC") Industry Guide 7. U.S. readers are advised that while these terms are recognized and required by Canadian regulations, these terms are not defined terms or the same as defined terms under SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. U.S. Readers are cautioned not to assume that any estimates of mineral reserves and resources shown in this presentation meet SEC Industry Guide 7 standards.

Cautionary Note / Notice to Reader

No Stock Exchange (Neither the TSX Venture Exchange nor its Regulation Services Provider nor CSE Stock Exchange nor its Regulation Service Provider) (as that term is defined in the policies of either the **TSX Venture Exchange or the CSE Stock Exchange**) **accepts responsibility for the adequacy or accuracy of this Material/Information or any update/presentation.**

Certain disclosure in this material constitutes "forward-looking information" within the meaning of Canadian securities legislation, including the Company's future plans going forward, possible future acquisition of assets, including mining assets, possibility of future undertaking of a Spin-Out transaction and the prospectiveness of the Company's assets/properties. In making the forward-looking statements in this Material/Information, the Company has applied certain factors and assumptions that the Company believes are reasonable, including that the Company will be able to obtain required approvals and financing and that results of exploration activities and assets being acquired will be consistent with management's expectations. However, the forward-looking statements in this material are subject to numerous risks, uncertainties and other factors that may cause future results to differ materially from those expressed or implied in such forward-looking statements, including the risk that the Company will be unable to obtain required approvals or financing and risks associated with its assets, including mineral exploration, including the risk that actual results of exploration will be different from those expected by management. There can be no assurance that such statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. Readers are cautioned not to place undue reliance on forward-looking statements. The Company does not intend, and expressly disclaims any intention or obligation to, update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by law.

Mr. Andrew Tims, a consultant to the Company, is a Qualified Person for the purposes of National Instrument 43-101 and has reviewed and approved the information of a scientific and technical nature contained in this Material/Information document and/or the Company's news releases.

The results and any resource referred to within this document, if any, and or the Company's website as "historical" are non-compliant with NI 43-101; a qualified person has not done sufficient work to classify the historical results or estimate as current mineral resources or mineral reserves. Thus, the historical results or estimate are not being treated as current results or mineral resource. The information regarding other properties in the **Jean Iron-Ore Property area** is considered relevant due to their location in proximity to the **Jean Iron-Ore Property**. However, the Company has not done sufficient work on the **Jean Iron-Ore Property** to determine whether it is geologically similar to the other properties. **Mr. Andrew Tims** has not verified any of the information regarding the other properties.

Disclaimer & Notice to Reader *Continued*

Cautionary Note / Notice to Reader *Continued*

The resource estimate information regarding properties in the information/ material ([including website](#)) area referred to, including any **Named-Properties** is considered reliable because it is based on a recent technical report filed by the owner. The reliability of the information regarding the [Cirque deposit](#), **if referred to during the Spin-Co creation period**, is unknown and is mentioned for historical purposes only, uses terminology not compliant with current reporting standards and the differences are unknown, and the key assumptions, parameters and methods are unknown.

Cautionary Note [Regarding Forward-Looking Statements - Cannabis Sector / Material/Information /Spin-Co's:](#)

Certain disclosure, by the Company (**resulting due to Spin-Out completed in September 2020 by AsiaBaseMetals Inc.**), including statements regarding the Agreement, the transactions contemplated thereby and the Company's pursuit of opportunities, may constitute "forward-looking information" within the meaning of Canadian securities legislation. In making the forward-looking statements in this Material /Information (including website), or release, the Company has applied certain factors and assumptions that the Company believes are reasonable, including that the Company will obtain the necessary regulatory approvals for the transactions contemplated by the Agreement, **the Medical-Cannabis-Permit will be obtained, the acquisition of City-New-Sub-Co-Ltd. by the Company will be completed as expected and will have the benefits expected by management.** However, the forward-looking statements in are subject to numerous risks, uncertainties and other factors that may cause future results to differ materially from those expressed or implied in such forward-looking statements. Such uncertainties and risks include, among others, financing risks, delays in obtaining or inability to obtain required regulatory approvals, the **Medical-Cannabis-Permit will not be obtained**, the Company will not be able to use the working capital to pay associated costs with the Agreement or **Medical-Cannabis Permit, as applicable, the acquisition of City-New-Sub-Co-Ltd. by the Company will not be completed as expected or will not have the benefits expected by management and changes in the Company's plans.** There can be no assurance that such statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. Readers are cautioned not to place undue reliance on forward-looking statements. The Company does not intend, and expressly disclaims any intention or obligation to, update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by law. There can be no assurance that the transaction contemplated by the Agreement will complete on the anticipated terms or at all.

Cautionary Note [Regarding Forward-Looking Statements – Real Estate Sector / Material/Information / Spin-Co's:](#)

Certain disclosure, by the Company (**resulting due to Spin-Out completed in September 2020**), including statements regarding the Agreement, the transactions contemplated thereby and the Company's pursuit of opportunities, may constitute "forward-looking information" within the meaning of Canadian securities legislation. In making the forward-looking statements in this Material/Information (including website), or release, the Company has applied certain factors and assumptions that the Company believes are reasonable, including that the Company will obtain the necessary regulatory approvals for the transactions contemplated by the Agreement, **the Rogoznica Project Acquisition will be completed, and related Permit will be obtained.** However, the forward-looking statements in this Material/Information - release are subject to numerous risks, uncertainties and other factors that may cause future results to differ materially from those expressed or implied in such forward-looking statements. Such uncertainties and risks include, among others, financing risks, delays in obtaining or inability to obtain required regulatory approvals, the Project and/or Permit will not be obtained, the Company will not be able to use the working capital to pay associated costs with the Agreement or Permit, as applicable, or will not have the benefits expected by management and changes in the Company's plans. There can be no assurance that such statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. Readers are cautioned not to place undue reliance on forward-looking statements. The Company does not intend, and expressly disclaims any intention or obligation to, update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by law. There can be no assurance that the transaction contemplated by the Agreement will complete on the anticipated terms or at all.
