

United States v. Princess Cruises, Ltd.

Government's Exhibits in Support of the Joint Factual Statement

1. Map of Caribbean Princess voyage August 26-27, 2013.
2. Display of Caribbean Princess engine room computer on 08.26.13 showing a discharge in excess of the capacity of the OWS.
3. Sounding sheets for 08-26-13 by four different crew members documenting the drop of Oilers showing drop in the Clean Bilge Tank.
4. Governmentt diagram of the standing pipe method of bypassing used in 2013.
5. Government schematic diagram of the oily bilge system on the Caribbean Princess.
6. Before and after photographs of the carbon filter pump showing the bypass pipe in place on 08-26-13 and removed on 08-28-13.
7. Before and after photographs of the carbon filter pump showing the bypass in place on 08-26-13 (left) and during U.S. examination on 03-08-14 (right).
8. Top of graywater tank #11 adjacent to the carbon filter pump.
9. Depitction showing how a flexible hose was used to transfer from the standing bypass pipe to the top hatch of graywater tank #11.
10. Interior of carbon filter discharge pipe when disassembled at the government's request on March 8, 2014.
11. Carbon filter tanks and carbon filter pump (lower left) showing discharge pipe on top of the pump before its removal.
12. Threaded bypass pipe and valve used prior to the installation of the standing bypass pipe.
13. Interior of threaded bypass pipe when disassembled at the government's request on March 8, 2013.
14. Depiction showing how a flexible hose was used to transfer from the threaded bypass pipe to the top hatch of graywater tank #11.
15. Depiction showing how a portable pump and flexible hoses were used to transfer from the transfer from the Clean Bilge Tank to the top hatch of graywater tank #11.
16. Static Oily Water Separator and pollution prevention placards.
17. Seawater valve opened during operation of the Static Oily Water Separator.
18. Pollution prevention placards mounted on the Static Oily Water Separator.
19. Pollution prevention placard mounted in the engine room.
20. Stub pipes found on the graywater system by Princess' replacement Chief Engineer.
21. Photos of the Caribbean Princess, Star Princess , Grand Princess, Coral Princess , Golden Princess.

DISCHARGE OF OIL PROHIBITED

The Federal Water Pollution Control Act prohibits the discharge of oil or oily waste into or upon the navigable waters of the United States, or the waters of the contiguous zone, or which may affect natural resources belonging to, appertaining to, or under the exclusive management and authority of the United States. If such discharge causes a film or sheen upon or discoloration of the surface of the water or causes a sludge or emulsion beneath the surface of the water. Violators are subject to a penalty of \$5,000 (33 CFR 155.450)

The person in charge of a vessel or facility must immediately report any discharge of oil or hazardous substance to the National Response Center toll free at (800) 424-8802. Conviction of failure to make this notification immediately upon discharge can result in a \$10,000 fine or 1 year imprisonment, or both.

(33 CFR 151-15(d): 33 CFR 153.203: 153.205)

DISCHARGE OF OIL PROHIBITED

The Federal Water Pollution Control Act prohibits the discharge of oil or oily waste into or upon the navigable waters of the United States, or the waters of the contiguous zone, or which may affect natural resources belonging to, appertaining to, or under the exclusive management authority of the United States, if such discharge causes a film or discoloration of the surface of the water, or causes a sludge or emulsion beneath the surface of the water.

Violators are subject to substantial civil penalties and or criminal sanctions including fines and imprisonment.
