

NEURAL GUARD

AI-POWERED AUTOMATED THREAT DETECTION

X-RAY SCREENING CHALLENGES - WITHOUT EYEFOX

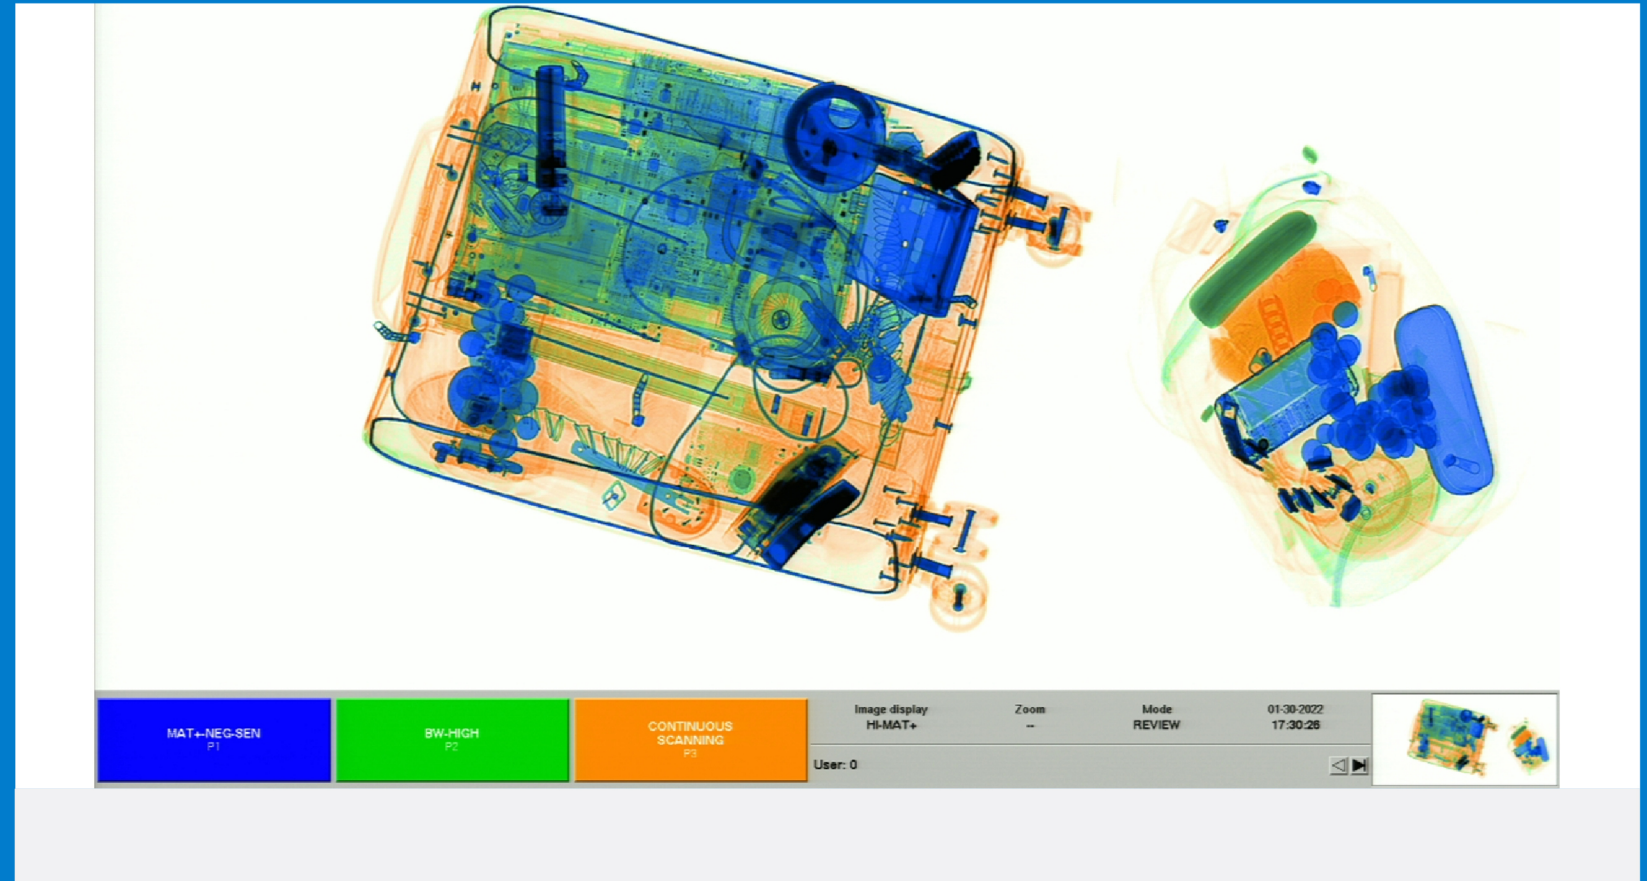

X-RAY SCREENING – WITH EYEFOX

DETECTING THREATS - WITHOUT EYEFOX

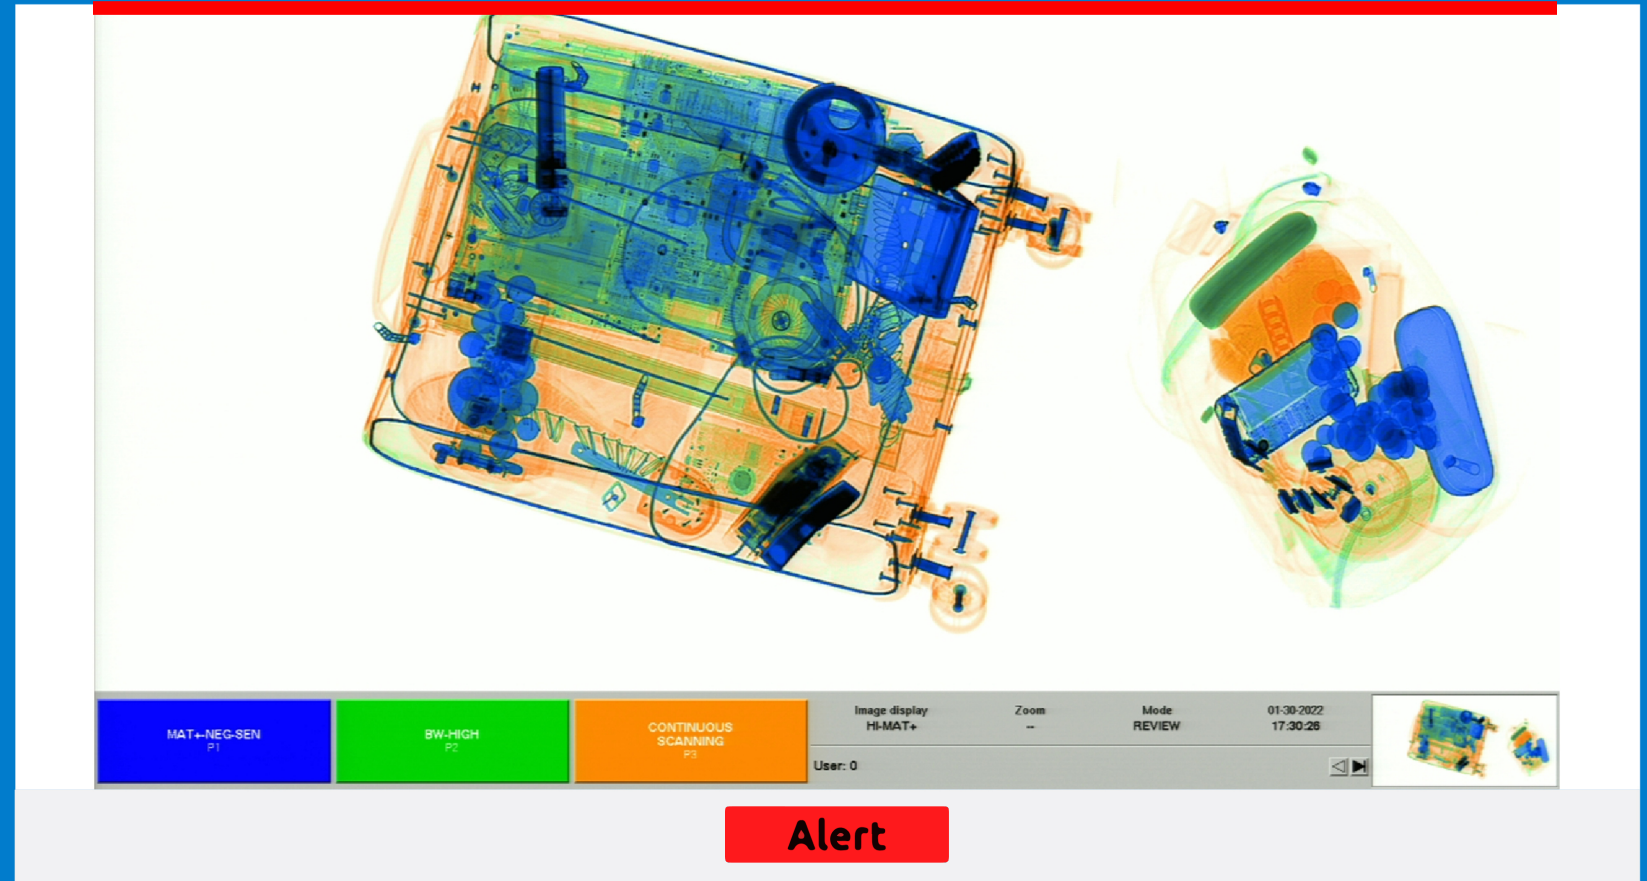

Can you spot all the threats?

The bag contains a disassembled handgun and an electric-shock weapon

Detecting Threats - With EYEFOX

Sub-second detection of
difficult-to-spot threats,
even behind a laptop

Taser

A normal flashlight with a metal ring that can also be used as a Stun Gun

Stun Gun

Innocent shoe with an
original metallic
reinforcement strip

The original shoe with the 'reinforcement strip', a utility knife.

Innocent shoe with an original metallic reinforcement strip

TECHNOLOGY ADVANTAGES

State-of-the-art Deep Neural Networks
Cutting edge detection algorithms, adapted for X-RAY
and CT Imagery

Data-Driven Approach
Over 10M real scans, covering a large variety of items,
annotated by highly skilled X-ray screeners

Versatile Deployment
Simple installation in various deployment scenarios,
compatible with multiple X-ray machines

Detection of the largest variety of prohibited items Firearms including
disassemble parts & airsoft guns, sharp items including folded &
utility knife, ammunition, LAG's, electroshock weapons, work tools,
hand grenades, improvised explosive devices (IEDs)

Accurate, consistent and fast
Over 90% detection, less than 3% false alarms

Efficient Product Pipeline
Processes and tools for minimizing cost and TTM while
maximizing quality
