AJAX
DISTRIBUTOR

Intrusion Alarm System

The Ajax Intrusion Alarm System offers advanced security with wireless sensors, motion detectors, and smart control panels. It provides reliable protection for homes and businesses, with instant alerts and remote management via a mobile app. The system is designed for easy installation and integration, offering a seamless and secure solution for intrusion detection.

SIEMENS

Building Management System

The Siemens Building Management System (BMS) offers comprehensive control and monitoring of building systems, including HVAC, lighting, elevators, energy management & etc. It enhances efficiency and comfort by optimizing operations and providing real-time data insights. Ideal for commercial and industrial buildings, Siemens BMS ensures a seamless, integrated approach to building automation.

Fire Detection & Alarm System

Our Fire Detection & Alarm Systems use advanced technology for reliable protection. We offer a range of solutions, including conventional, addressable, semi-addressable, intelligent control panels, and wireless systems. With top brands like TNA, Bosch, Honeywell, and Ajax, our systems provide high-performance detection to meet your specific needs and ensure effective fire safety.

Public Address & Intercom System

Our Public Address (PA) systems from TOA and ITC amplify sound for clear communication in any environment. We also offer intercom systems from Hikvision, Dahua, and ITC for reliable two-way communication and enhanced security. The choice of brand is customized to your specific needs and preferences.

Structured Cabling

We provide structured cabling solutions with top brands like Cisco, Panduit, and Belden. Our systems offer reliable, high-performance connectivity for a range of applications, ensuring efficient and organized network infrastructure.

Access Control System

We offer comprehensive access control and time attendance solutions from Dahua, Hikvision, ZKTeco, HID, and Salto. Our systems include advanced features such as facial recognition, biometrics, cards, Visitor Management Systems (VMS), Parking Systems, turnstiles, Boom barrier, lift access & etc., ensuring robust security and efficient management tailored to various environments.

Ruijie
NETWORKS

Network Security System

We offer network security solutions from Sangfor, TP-Link, H3C, Ubiquiti, and Ruijie. Our systems provide comprehensive protection with features like intrusion prevention, firewall management, VPN support, and real-time threat monitoring. We also offer cloud-based solutions, access points, Wi-Fi, switches, gateway controllers & etc., to ensure robust defense and reliable network performance across various applications.

Security Inspection

We offer a range of security inspection systems, including X-ray machines, walk-through metal detectors, handheld X-ray devices, and AI detection X-ray systems. Our offerings include brands like Dahua, Hikvision, ZKTeco, Videray, and Eyefox Neural AI Detection, tailored to meet the specific requirements of our clients.

MAXHUB

Free and boundless collaboration

ViewSonic[®]
See the difference[™]

Interactive Monitor

We offer interactive monitors in sizes ranging from 55" to 100", perfect for collaboration in offices and smart school solutions. With brands like Dahua, Hikvision, Maxhub, and Viewsonic, we provide tailored solutions to meet client needs.

**HUALIAN
INDUSTRIAL**

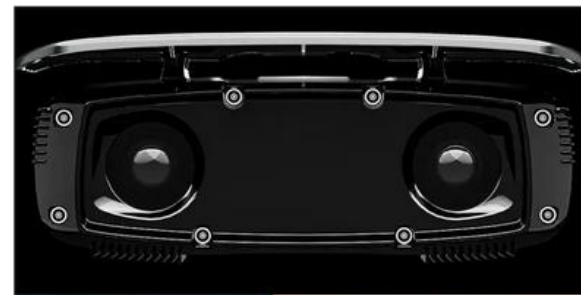

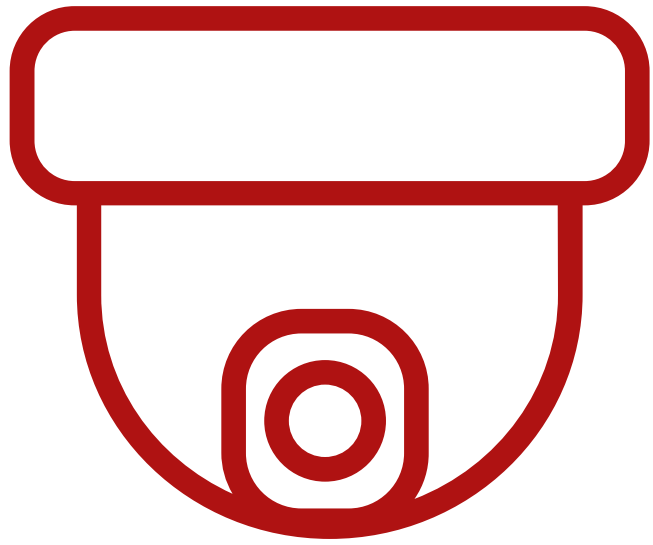

Body-Worn Camera

The Hualian Industrial BVH04W features a 5.0MP lens, 122° FOV, and supports up to 2k video resolution. It offers 32GB storage (expandable to 512GB), GPS, 4G/Wi-Fi, and a battery with over 9 to 10 hours of recording. The rugged design includes IP68 protection and MIL-STD-810H compliance, suitable for extreme conditions.

Smart City Security Solution

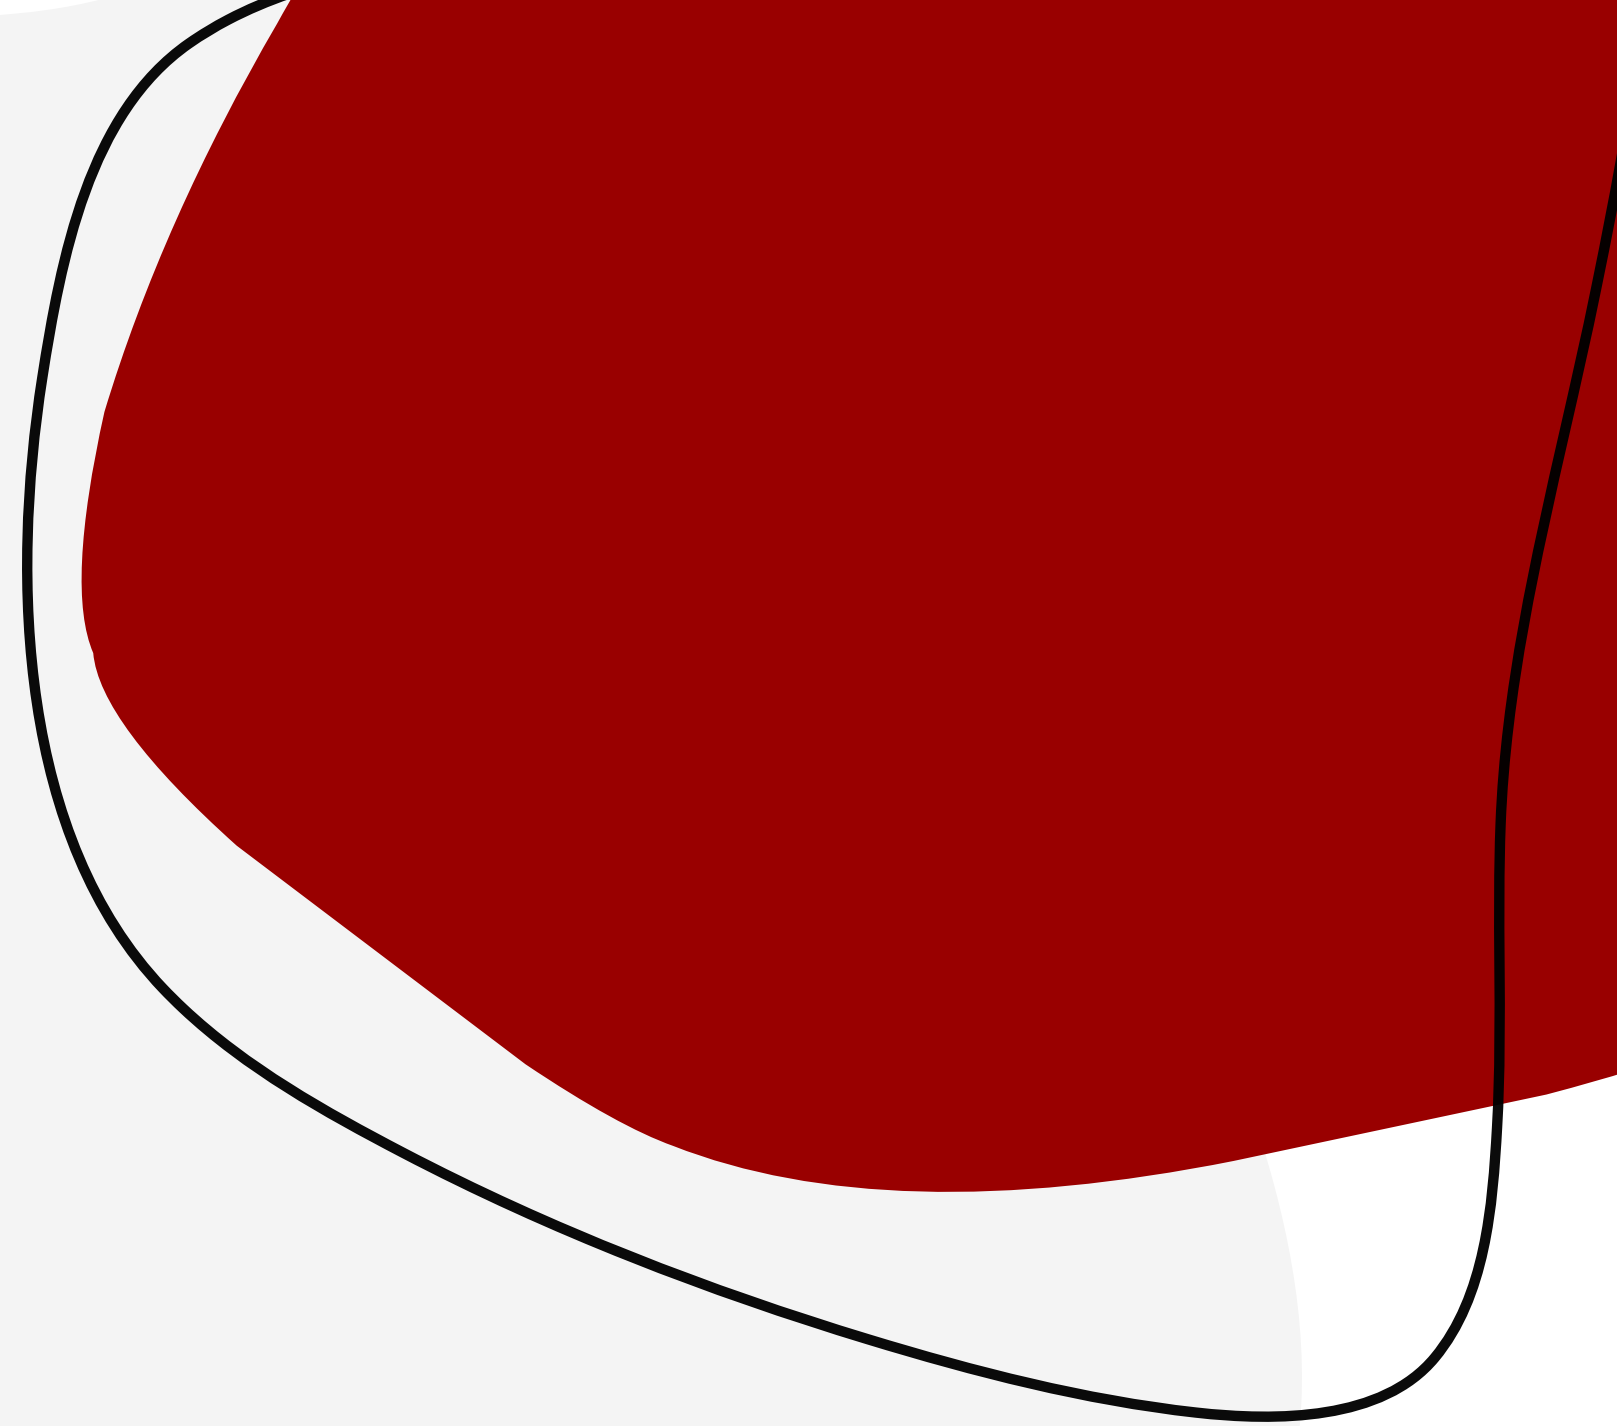

Ekin Smart City Solutions is a global leader in AI-powered smart city technology. They specialize in developing software, hardware, and design solutions for efficient urban management. Their focus areas include smart traffic, public safety, parking, and environmental management. Ekin's innovative approach helps cities optimize resources, improve safety, and enhance the quality of life for residents.
