REACH: Registration, Evaluation, Authorization and Restriction of Chemical Substances

Lusk Quality Machine Products is a manufacturer of component metal parts. Parts are produced from raw bar stock material specified by customer drawings and/or specifications. The bar stock raw material as defined by REACH, do not intend or expect any of the listed components to be released as part of the inherent composition. As a result, such products are considered exempt from the registration and pre-registration under the requirements of REACH.

RoHS

Under current RoHS Directive, ten substances have been identified whose content must be limited per Annex II <http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:32015L0863> Lead is allowed in steels up to .35% by weight, 6(a) and aluminum up to .4% by weight 6(b), Copper up to 4% by weight 6(c). Raw material used by Lusk Quality Machine Products, with rare exception, are compliant to the RoHS Directive. Customers who wish to verify chemical composition should request Material Test Reports as part of their purchasing process
