

The Board of Directors will be calling for a shareholder vote for or against a proposal to transfer its North Ogden area portion of its secondary water system to a larger neighboring provider, Weber-Box Elder Conservancy District for future operation, maintenance and billing to the current users. All shareholders are invited to vote on this proposal regardless of their service area.

The proposed transfer aims to:

- Provide reliability and long-term sustainability
- Provide access to modern technology and better ability to provide users with real-time monitoring
- Better long-term maintenance and infrastructure planning with a provider that has expertise and a full-time staff available to provide reliable delivery of secondary water

What does this mean for you as a user:

- You will continue to receive secondary water
- Existing infrastructure will remain in place
- Transition will be managed to minimize disruptions
- Service will remain the same or better
- You will continue to receive your existing allocation of water (providing drought conditions don't restrict water availability).
- Rates may change with this change as Weber-Box Elder determines their rate structure for this area. (Please keep in mind that Mt View rates are also subject to future increases.)
- Current Shareholders in this area will no longer be shareholders as their shares (which are only allocated to the property) will be transferred to Weber-Box Elder
- You will no longer receive an annual Water Assessment, but your water will be billed with your property tax notices

Additional questions can be submitted via the website and will be addressed at the Share Holders Meeting. In addition, questions can be presented at the meeting.

Office Staff will not be answering any questions so please either submit on the Website or come to the meeting with your questions.

Thank you,

Mt View Irrigation Board of Directors
