Nanotechnology Bullet Resistant Solution Could Prevent More Tragic Nashville and Uvalde Shootings

Could CBNT's Bullet-Resistant System for Glass Have

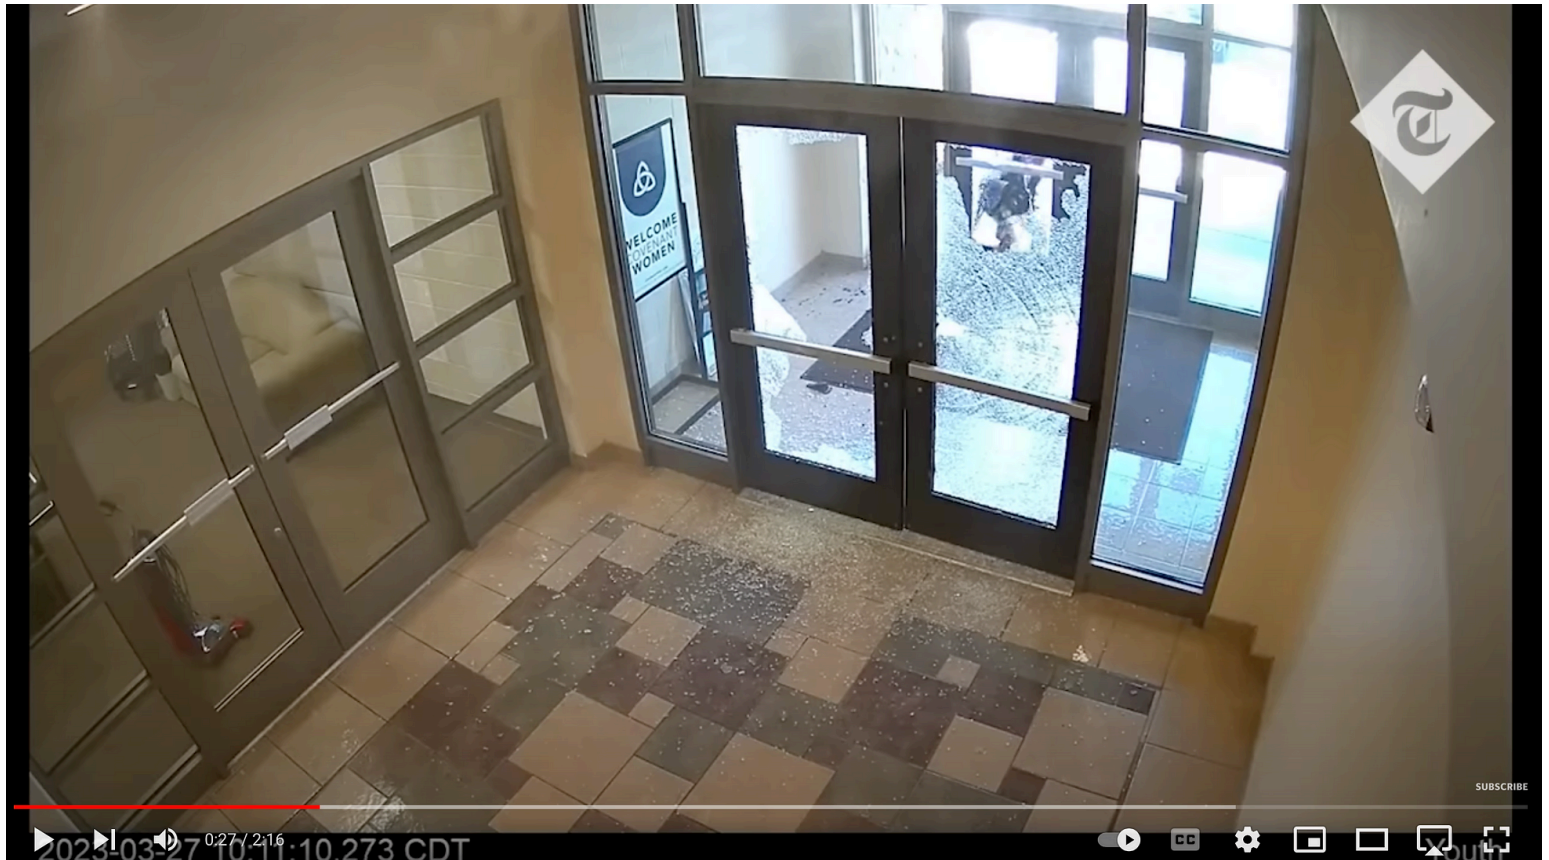

Averted Nashville and Other School Shootings?

- See [video](#) of CBNT Patriot Glass Solutions' products stopping bullets - even from assault rifles
- See [video](#) of Nashville shooter blowing out the windows of the locked school doors to gain forced entry. Almost every school with locked glass doors and windows is vulnerable to bullets and high-impact weapons
- If windows were bullet and impact-resistant, forceable entry could be delayed, which could save lives
- Schools and other concerned facilities are discovering C-Bond Systems and installing its bullet-resistant Patriot Glass Solutions products to improve safety
- CBNT is trading at .0056 with 447 million shares outstanding and a market cap of about \$2.5 million

School shootings have been on the rise and the recent tragedies of Nashville and Uvalde are sending high-priority alarms to take swift action to protect innocent children and teachers from shooters armed with deadly assault rifles. Schools, parents and government agencies are more motivated than ever to take actions to stop these tragic shootings.

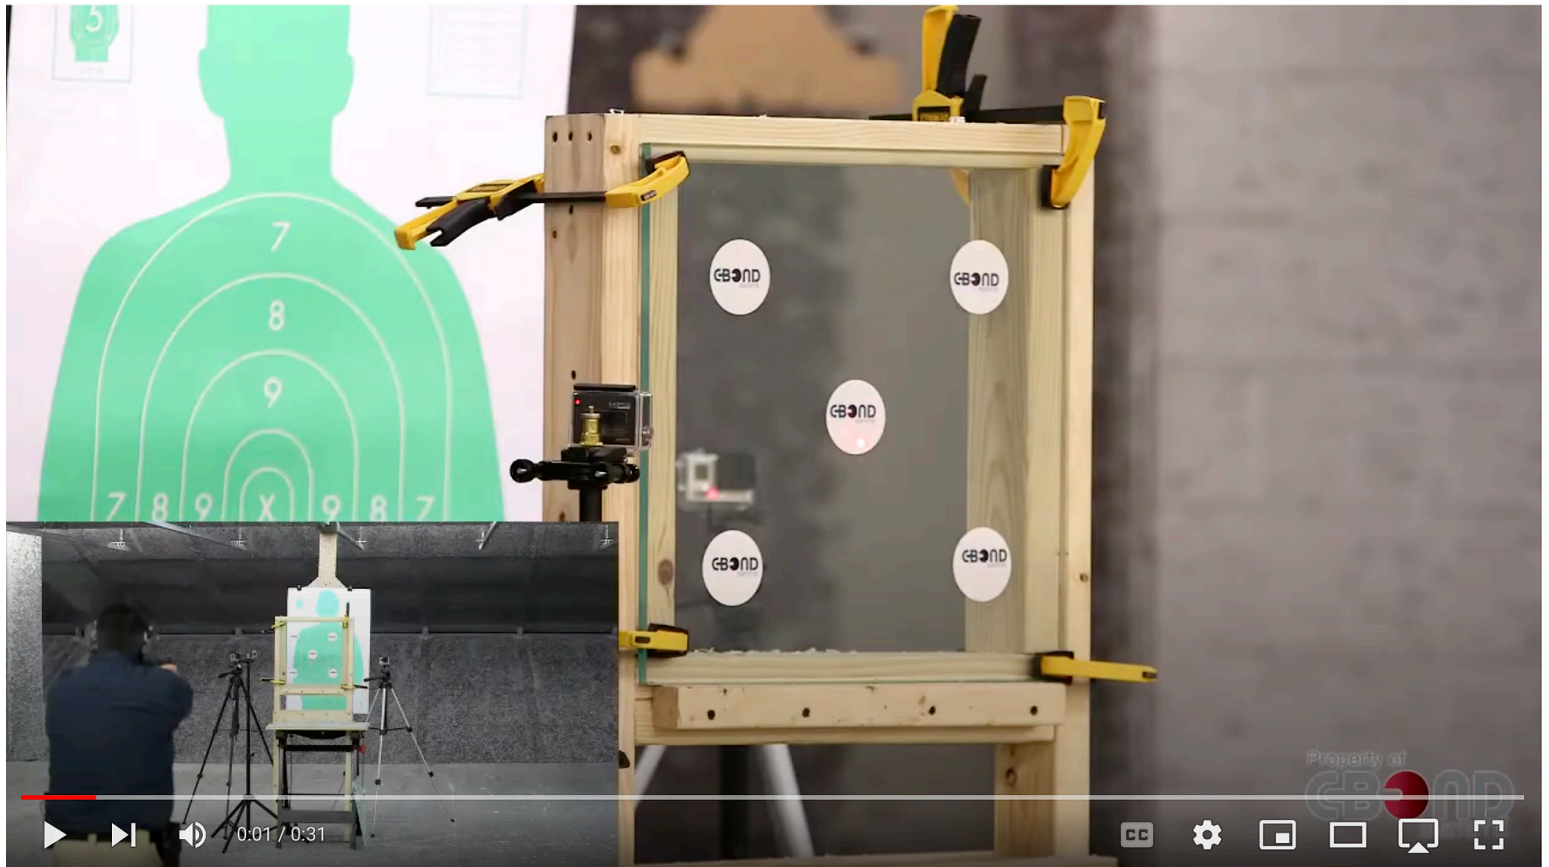

C-Bond Systems (OTC: CBNT) has stepped forward with a patented solution that is beginning to get a lot of attention and believes demand for their forced entry and bullet-resistant window film systems is about to increase dramatically. Through their Patriot Glass Solutions division, C-Bond Systems is offering a one-of-kind bullet-resistant system for glass that stops bullets from an attacking shooter but at the same time allows a trained shooter inside the school or other facility to fire back at the shooter through their one-way bullet-resistant system. There is no one-way bullet resistant product like this in the world.

Watch this [video](#) of the Nashville shooter blowing out the glass in the entrance doors to gain entry. If Patriot Glass Solutions' bullet-resistant glass were installed, the shooter would have been delayed and the tragedy might have been avoided.

Police release chilling video of Nashville school shooter moments before massacre

Now watch this [video](#) demonstrating C-Bond's breakthrough bullet-resistant system that could have delayed the Nashville shooter and possibly prevented this terrible tragedy.

Five Shot Ballistic Demo

In October 2022, the State of Texas Legislative Budget Board approved, and the State of Texas transferred \$400 million in funding to help school districts replace or improve windows, doors, fencing, and other safety measures.

"These proposed requirements set forth by the Texas Education Agency and the state funding that has already been approved represent a potentially massive opportunity for C-Bond and Patriot Glass Solutions," said Scott R. Silverman, Chairman and CEO of the Company. "We are the leading provider of entry-resistant security film and ballistic film in Texas schools with approximately 100 installations. An additional benefit of window film over fencing for schools is that fencing can be cost-prohibitive and can make schools feel more like prisons." Silverman continued, "This issue is top of mind for many in Texas, as demonstrated at the conclusion of Governor Greg Abbott's inauguration speech on January 17, 2023, when he declared, 'We will not end this session without making our schools safer.'"

The Company has retained Austin, Texas-based public affairs firm Black Diamond Strategies, L.L.C. to continue to arrange meetings with relevant state policy makers to better understand and position the Company for this significant market opportunity. The \$400 million dollar Texas funding initiative to protect schools from shooters is just the tip of the iceberg and is likely to become a widespread effort in every state.

Unique One-Way Bullet Resistant Protection

In addition to resisting bullets fired from the outside of a school building, C-Bond Systems' Patriot Glass Solutions offers one-way protection that allows a trained security guard to shoot back at the intruder right through the same glass that allows the bullet to pass in

one direction only. This is the only known glass technology that allows a bullet to penetrate in one direction but resists a bullet penetration in the opposite direction.

C-Bond Technology Acquired from Rice University

C-Bond's nanotechnology was developed in conjunction with experts at Rice University, the well-known developer of nanotechnology. C-Bond's solutions work by repairing irregular microscopic irregularities on all glass surfaces that cause the glass to be brittle and vulnerable to impact. It can make the glass up to 150% stronger on top of which it adds additional film coatings that further enhance strength characteristics.

C-Bond Works on Brittle Materials

C-Bond's solutions apply to brittle materials such as glass and concrete, but the company is first focusing on glass applications. Patriot Glass is the division that strengthens architectural glass to be bullet resistant. Its Transportation Solutions Group division specializes in treating auto glass to become far more resistant to damage from road hazards.

C-Bond for Autos

Auto windshields are the number 1 insurance claim in the U.S. where the market for auto glass replacement exceeded \$5 billion in 2016 and is expected to exceed \$8 billion by 2025. Pilot studies with a large car rental agency proved savings of up to an 80% reduction on repair and replacement costs. Windshield damage from rocks is a very big number.

C-Bond Revenues Beginning to Climb

C-Bond Systems recently reported 2022 revenue in excess of \$2.2M, an increase of 51% from 2021. Investors are encouraged to visit [C-Bond Systems](#) for more detailed information.

Conclusion

C-Bond Systems offers an exciting solution that can help protect thousands of school children and teachers and also large numbers of individuals and companies seeking better safety and protection. Their glass strengthening solutions are positioned for rapid industry uptake that could have a significant impact on the company's shares. Revenues are just beginning to climb that could indicate a new wave of expected growth is beginning to materialize.
