Real Results From My Experience

I have personally implemented these strategies across my portfolio of 18 properties, with 10 more currently under development. Through strategic space optimisation, I have achieved:

- 5.3X increase in rental yield per square metre
- Transformation of a €450 monthly income property into one generating €2,400 monthly
- Rate increases from €9 per square metre to €48 per square metre
- Annual income growth from €5,400 to €28,800 from a single property

I maintain these properties with minimal time investment through carefully designed automation systems, spending approximately 10 minutes every three days on client communication.
