PORTFOLIO SELECT® *Series*

The Portfolio Select® series is our top tier—with the style, quality and features found in expensive custom-built cabinetry.

New Haven® PAINTED STONE

Sierra Vista® PAINTED LINEN AND PAINTED STONE

Windsor™ MAPLE TRUFFLE AND PAINTED CASHMERE

Sierra Vista® PAINTED HARBOR

Sierra Vista® COLLECTION

To reach the high point of elegance, head to Sierra Vista®. This solid wood door style with mitered cuts at each corner is reminiscent of a fine picture frame. A classic and sophisticated design, with furniture quality mortise-and-tenon construction and extra-wide three-inch frames surrounding a raised center panel.

Sierra Vista® DOOR STYLES

Sierra Vista® doors are solid wood, full overlay, and designed with a raised-panel mitered style. Matching five-piece mitered drawer front. Available in cherry, maple, and painted finishes.

UNIQUE RESULTS

Our glazes are hand-wiped onto each door and drawer, so the glaze settles naturally into corners and grooves, adding a layer of contrast. No two doors will be exactly alike, which is part of glaze's custom effect.

DISTINCT LOOK

Each collection profile is different, so every door and drawer to which glaze is applied has a distinct look. Each door – and kitchen – becomes one of a kind.

GLAZE OVER A LIGHT BASE COLOR CREATES THE GREATEST CONTRAST. AREAS WHERE THE GLAZE SETTLES WILL BE MORE NOTICEABLE.

GLAZE OVER A DARK BASE COLOR CREATES LESS CONTRAST. IT WILL ALSO DARKEN THE OVERALL FINISH.

IT'S A *fact* OF NATURE

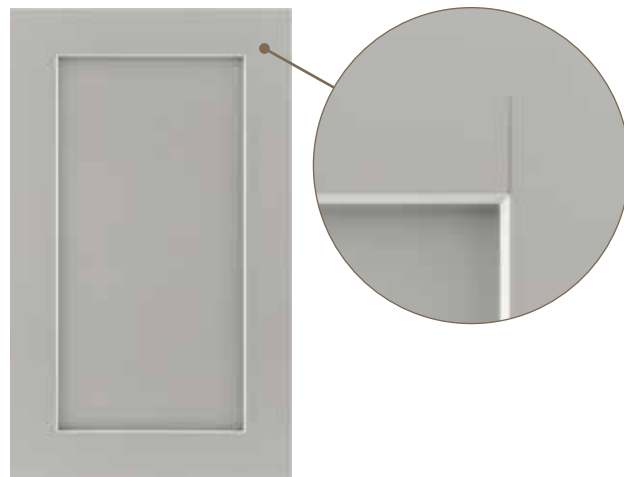

No two pieces of wood are exactly alike — *even from the same tree.* These variations contribute to the beauty and distinction of fine cabinetry. Yet, it is important to understand what to expect.

NATURAL FACTORS

The following characteristics are natural and are not considered defects:

- » Naturally occurring color, grain and texture differences
- » Color deviations, even within the same section of wood
- » Differences between open- and closed-grain areas
- » Visible mineral streaks and worm tracking

Just as wood naturally expands and contracts, so do door joints. Periodically, you may see hairline cracks in the finish surface at the joints. These are normal and do not affect the integrity of the door.

AS WOOD NATURALLY EXPANDS AND CONTRACTS, JOINT LINES MAY BECOME NOTICEABLE.

CARE & CLEANING

While our laminate, painting and wood finishing processes promote durability, care should be taken to preserve the original factory finish:

- » Wipe up spills immediately
- » Use mild soaps only
- » Be sure to read all cabinet care guidelines and cleaning product instructions carefully

ENVIRONMENTAL FACTORS

Cabinetry added at a later date may not match the original cabinets installed. This may be due to:

- » Exposure to sunlight, smoke and chemicals
- » Change in door samples or displays due to age (they may no longer be a true color representation)

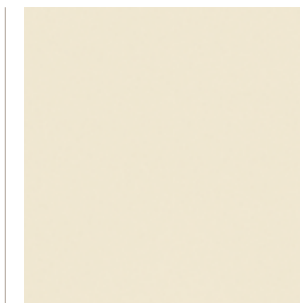

Because of environmental factors, Timberlake is not responsible for texture differences or color and wood grain variations in wood or laminate materials used in your cabinets.

CHOOSE YOUR MATERIAL

CHERRY

Cherry is a closed-grain hardwood with uniform texture, known for its warmth and distinctive curly figures and pin knots. Its natural color ranges from pale yellow sapwood to deep reddish brown heartwood. From the time it is cut, cherry begins to darken. This gradual change gives the wood its warmth and charm. Cherry is particularly attractive when stained a deep, rich color.

DURAFORM™

Duraform™ uses a highly-technological manufacturing process to bond foils and coatings to medium density fiberboard, high density fiberboard and similar materials to achieve a product with exceptional stability, consistency and durability.

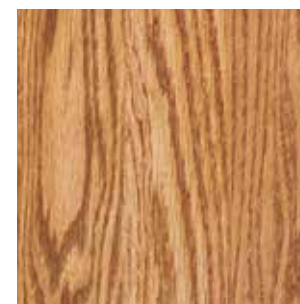

HARDWOOD

Hardwood cabinetry has a dense structure and comes from a combination of deciduous trees such as maple, oak, birch, cherry, hickory, poplar, or ash. Natural colors range from light blonde to dark reddish brown tones. These hardwoods may contain mineral streaks, slight differences in graining, and color variations.

MAPLE

Maple is an extremely hard wood with a fine, smooth, even texture. Its color ranges from a light to cream-colored sapwood. Although it has a uniform straight grain, it may exhibit wavy, curly, bird's eye or burl graining. Maple is one of the most popular choices for cabinetry due to its durability and natural luster.

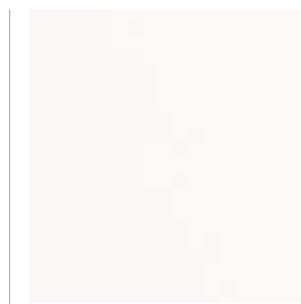

OAK

Oak is an open-grained hardwood with patterns ranging from straight grain to wide arcs. When stained, there is a noticeable difference in the color between the open- and closed-grain areas. Wood cut from the heartwood will range from pink to reddish brown. Because of the distinct grain, oak is a popular choice for cabinetry.

PAINTED

Painted finishes combine hardwoods and engineered materials to achieve a product with superior stability, consistency, coverage and durability. These finishes yield radiant painted cabinetry leaving natural wood grains less evident. Visible joint lines may appear due to the natural expansion and contraction of wood.

THERMOFOIL

Thermofoil is a process whereby a thick vinyl film is bonded permanently to a warp-resistant engineered wood core. Because the color is throughout the film, the surface is durable, easy to clean and especially resistant to chipping and cracking.

CABINETS BUILT-TO-ORDER

Since all Timberlake® cabinets are built-to-order, special construction needs are not a problem. These options do not add time or complexity. All options are shipped as part of your regular order in the standard turnaround time.

REDUCED DEPTH CABINET OPTION

Both wall and base cabinets are available with reduced depths in one-inch increments.

INCREASED DEPTH CABINET OPTION

Deeper cabinets often come in handy for designers. Our Increased Depth Option for wall cabinets allows you to select cabinets deeper than the standard 12" depth on cabinets up to 36" wide. The Increased Depth Option is available in one-inch increments from 13" to 24" deep on the following cabinets: Wall Cabinets, Peninsula Wall, Blind Wall, Blind Wall Peninsula, Straight Appliance Garage, and Bookshelves.

INVERTED FRAME CABINET OPTION

The Inverted Frame Option, available for most standard base cabinets, allows the drawer to go below. This option is also available for Base Pot & Pan Organizer and Factory Installed Wastebasket Cabinets.

MATCHING INTERIOR CABINET OPTION

Ideal for built-in cabinets, the matching interior upgrade provides an interior color that matches the exterior finish for a custom look.

VOID DOOR CABINET OPTION

The Void Door Option means cabinets will ship without doors, battens or hinges. Since stiles are pre-drilled for hinges, molding is used to provide a finished look. Choose from three moldings to be cut and field installed.

CUSHIONCLOSE® HINGE OPTION

The CushionClose® Hinge Option features a slow closing mechanism that helps reduce slams and noise, and is available on Portfolio Select® and Portfolio® series cabinets.

CUSHIONCLOSE® GLIDE OPTION

The CushionClose® no-slam, drawer closure system is available on Portfolio Select® and Portfolio® series cabinets on most drawers and a wide variety of accessories.

FURNITURE ENDS OPTION

The finished look of the Furniture Ends Option for cabinet sides is available on most Portfolio Select® and Portfolio® cabinets. The ¾" plywood side panels can be chosen for individual cabinets or the whole room.

ALL PLYWOOD CONSTRUCTION (APC) OPTION

The APC option is available for all Portfolio Select® and Portfolio®* door styles and features ½" plywood sides, floors and cabinet tops. The captured back, inset toe kick, corner blocks and shelves are also constructed with plywood. The plywood side panels are finished to match your chosen cabinet color with our multi-step BeautyGuard® finishing process.

PLYWOOD ENDS OPTION

This option adds extra strength. These ½" thick plywood panels are finished to match your chosen cabinet color.

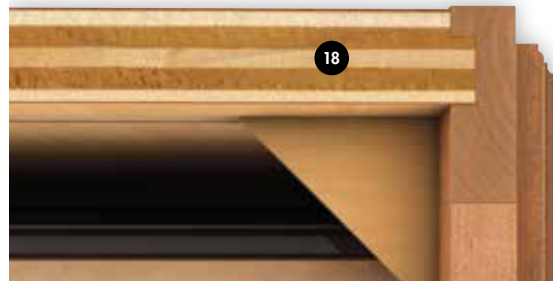

DEEP DOVETAIL SLIDING SHELVES

Forget hunting for things in the back of the cabinet. These sturdy trays slide everything into view. Tray kits fit both standard base and utility cabinets.

*Dovetail Full-Access Drawer Option required with APC option on Portfolio® door styles.

AN INSIDE LOOK AT TIMBERLAKE® FEATURES

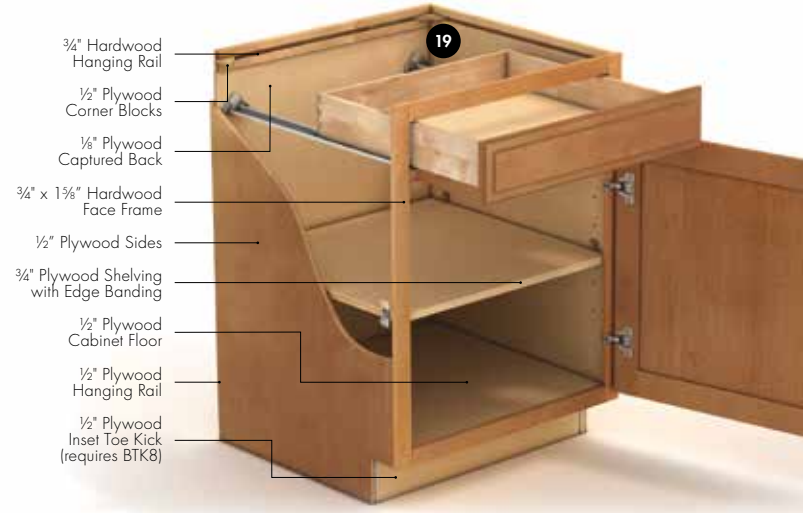

FURNITURE ENDS OPTION

3/4" Furniture Ends Construction

Shown with All Plywood Construction Option. Also available with Standard Construction.
