

# Twelve Month Season

## Staying in practice during off season shooting

By Dennis Guldan

Pro-football players have a four game preseason after several weeks of practice. Pitchers and catchers show up several weeks before the rest of the team and then play for a month before the games count. So what makes us think that we can take 4-6 MONTHS off of shooting and pick up just where we left off?

quicker and cheaper than going to the range.

The system I got had a laser that attached to the muzzle and a connection to the firing finger to control the muzzle laser. I also got a unit that puts a laser on the wall the same as you would find at a trap/skeet range.

Well Robert Louis Company has made a product for shooting that means we can practice all winter and not lose those fine tuned skills. And we can do so without buying shells, a trip to the range or putting on a jacket. You can do so at home. I'd suggest your basement so you don't get a visit from the local men in blue for having a gun in your living room. The system is called the Ultimate Practice Shooting system. It is a system of lasers attached to the gun and a broadcast scanner so you can train all winter. It's great!

The Robert Louis Company lent me a system so I could try it and report to you. And they are NOT High priced. Systems start at \$159, the cost of a nice Christmas or Birthday present, and a WHOLE lot
