SUMMARY DESCRIPTION OF BUSINESS

What is our business?

ANON is a computational intelligence and decentralized network technology company focused on developing and commercializing a proprietary suite of artificial intelligence (“AI”) and privacy-enabled products designed to enhance consumer and business confidence in technology. Its core offering is the “Limitless” Virtual Private Network (VPN), a privacy-first, AI-enabled platform that allows decentralized users and machines to interact with data, value, and counterparties without reliance on third parties. This approach provides significant benefits, including user privacy, full control, and ownership of both personal and corporate data.

The Company’s product portfolio currently includes:

- **Limitless VPN** – a functional privacy-driven VPN offered free to the public;
- **Turminal.ai** – an AI platform presently in beta development; and
- **Haller.ai** – an AI-driven solution under active development.

All products are being enhanced to align with global industry standards, and the Company anticipates potential rebranding of its technologies in 2025 to better reflect evolving consumer and subscriber needs.

Although ANON remains in the pre-revenue stage, current efforts are focused on customer acquisition, product development, and product improvement. The Company is engaged in discussions with global enterprises regarding licensing and partnership opportunities to leverage its AI technology across multiple industries, including AI data solutions for the oil and gas sector as well as forest fire mitigation and response.

To support monetization, ANON has entered into a contract with a leading international web data collection and proxy B2B company. This agreement enables the commercialization of the Limitless VPN and Turminal.ai products through ANON’s proprietary SDK public data mining plugin.

While the Company intends to apply the proceeds of the Offering as outlined, circumstances may arise where, for sound business reasons, a reallocation of funds is considered prudent or necessary. Actual allocations and expenditures may therefore differ materially from those disclosed, as they will depend on a number of factors, including the Company's ability to successfully execute its business plan.

The Company's most recent audited annual financial statements and unaudited interim financial statements include a going concern note. The Company remains in the development stage, has not yet generated revenues, has experienced negative operating cash flows since inception, and continues to rely on external financing. These conditions may cast significant doubt on the Company's ability to continue as a going concern. The Offering is intended to enable the Company to further develop and enhance its products, initiate monetization efforts, and expand its user base. However, the Offering is not expected to affect the inclusion of a going concern note in the Company's next financial statements.
