

## Who We Are

**AILABOUNI®** is revolutionizing the energy industry by creating clean, low emission fuel technologies that **reduce operating costs and improve thermal efficiency**. We're committed to creating fuel products and technologies that reduces the impact on our environment and contribute to energy transition.

## Global Leader

Our technologies benefit global communities by **reducing the environmental & social impact of hydrocarbon fuels**. Our **RAM7®** solution is the single most important and financially viable alternative fuel solution in the market.

## CLEAN FUEL TECHNOLOGY

### Solving environmental and health matters

**RAM7 HydroDiesel** is a **green, advanced fuel** that is designed to significantly **reduce emissions, extend the life of engines and maximize performance**, all while providing more value than regular diesel. At the core of RAM7 HydroDiesel is our unique technology, that forms a stable, long term nano emulsion allowing water to mix with fuel oils creating greatly enhanced combustion.

## The advantages of our fuel

**Lower cost of ownership compared with regular diesel** while providing better maintained engines

**Increases thermal fuel efficiency**, allowing you to burn less total hydrocarbon fuel.

**Friendly green energy fuel** that has a lower carbon intensity index (CI) and burns cleaner than regular diesel and biodiesel.

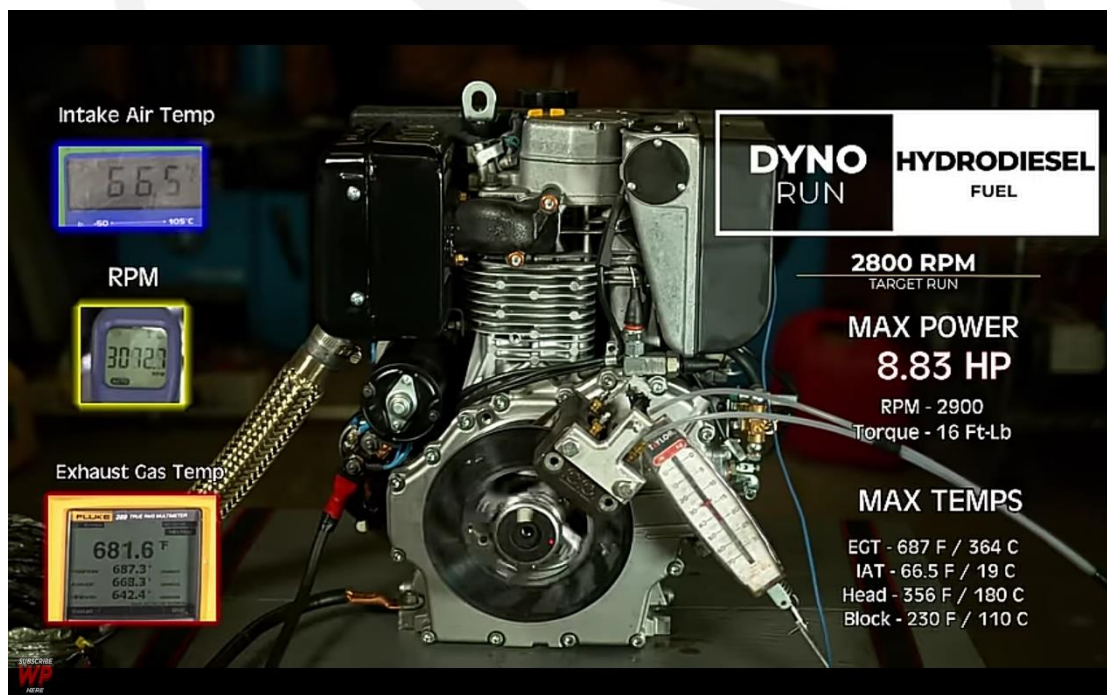

**Reduces the levels of CO<sub>2</sub>, NO<sub>x</sub>, Sulfur, Particulate and black carbon** emissions by up to 70%

**Less engine stress**, wear & tear with longer lasting lube oil which prolongs the life of diesel equipment.

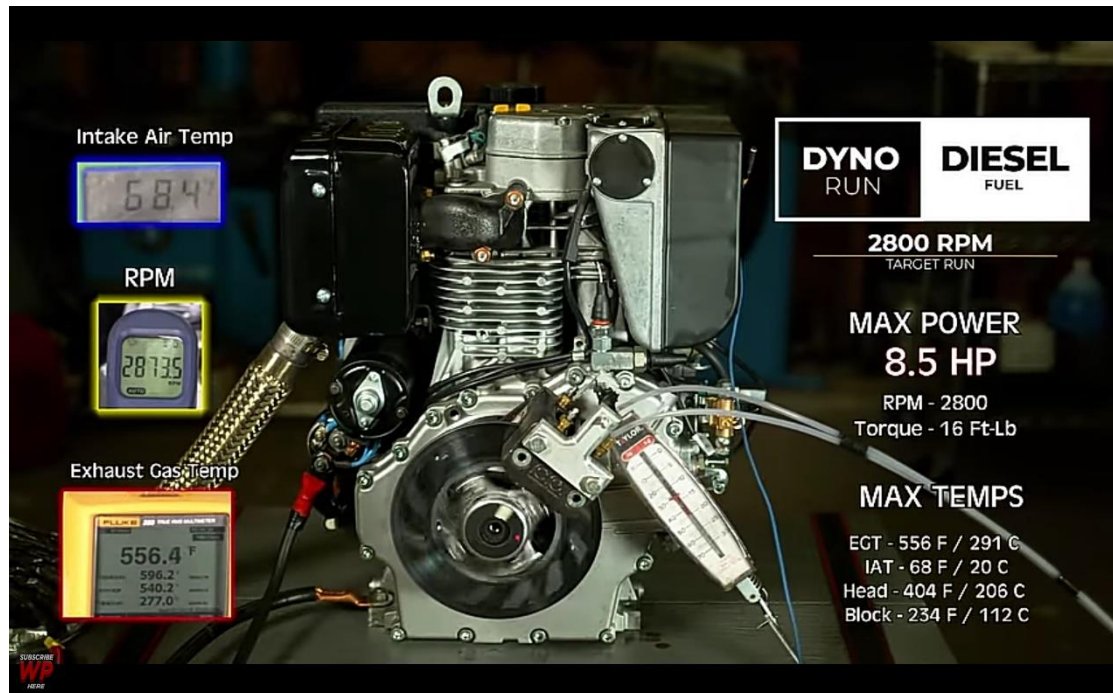

**RAM7 HydroDiesel fuel solution has a broad application** and is applied to All diesel engines, dyed diesel, marine gas oils, renewable & bio fuels.

## Practical comparison between regular diesel, biofuel and hydrodiesel (in numbers)

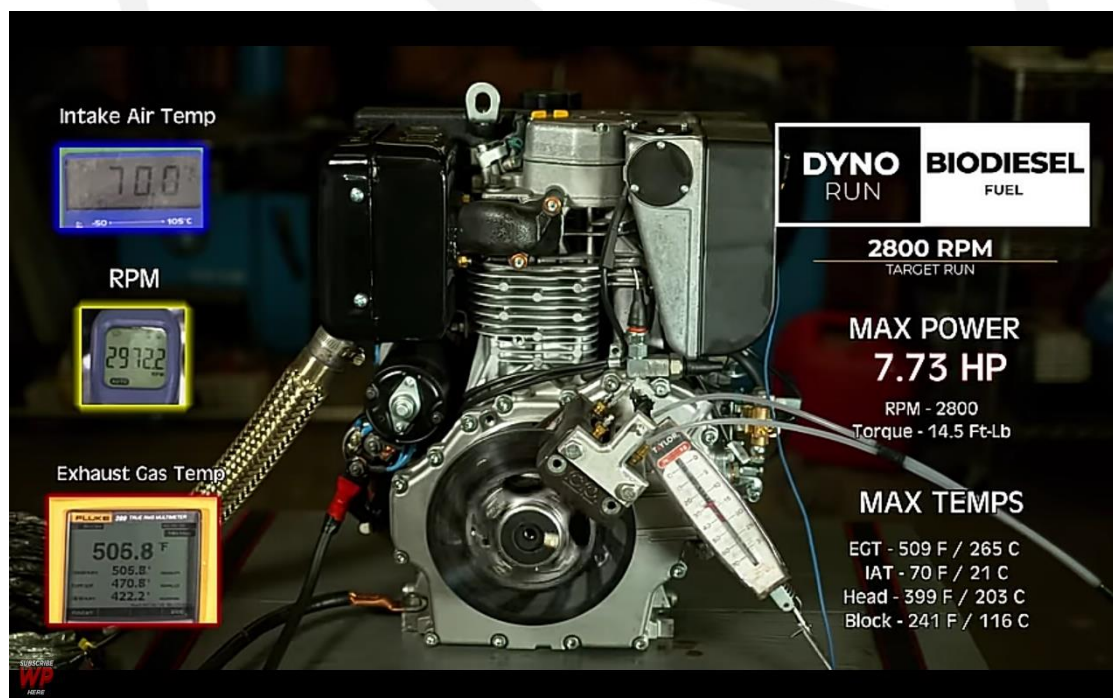

HYDRODIESEL

**DIESEL**

**BIODIESEL**

#### RAM7 HYDRODIESEL BURNS CLEAN

An example of coking of nozzles of burners operating on boiler - furnace fuel No.1 (Normal Fuel) and No.2 (Hydro fuel)

Our proprietary RAM7 HydroDiesel is a friendly, green energy fuel that **burns cleaner than regular diesel and biodiesel**, reducing the levels of harmful emissions by more than 33%.

Welcome to a **clean** world with our unique solutions
