

FAVORITE EVERGREEN SHRUBS

Arctostaphylos uva-ursi 'Massachusetts' (**Massachusetts Kinnikinick**) - Zone 2. 6 inches high x 2-4 feet wide. Slow growth rate. Full sun or partial shade. Dry or moderate soil. Small pinkish white flowers in April or May. Bright red berries in late summer. Good ground cover. Do not fertilize. Drought Tolerant.

Buxus microphylla koreana 'Winter Gem' (**Winter Gem Korean Boxwood**) - Zone 5. 3-4 feet high x 3-4 feet wide. Slow growth rate. Partial shade or full shade, protected area. Moderate or moist, well-drained soil. Hardest Boxwood. Shiny deep green leaves that hold color well in winter. Excellent for hedging. We recommend planting close to your house on the north or east side.

Buxus sempervirens 'Suffruticosa' (**True Dwarf Boxwood, Dwarf English Boxwood**) - Zone 5. 3-4 feet high x 3-4 feet wide. Very slow growth rate. Partial shade or full shade, protected area. Moderate or moist, well-drained soil. Very dense, compact plant with dark green leaves. Excellent for hedging. We recommend planting close to your house on the north or east side.

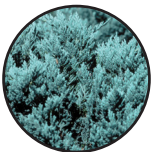

Erica x darleyensis 'Mediterranean Pink' (**Mediterranean Pink Heather**) - Zone 4. 1 foot high x 2 feet wide. Slow growth rate. Full sun or partial shade. Moderate or moist, well-drained soil. Rosy-pink flowers February - May.

Euonymus fortunei 'Emerald Gaiety' (**Emerald Gaiety Euonymus**) - Zone 5. 2-3 feet high x 3-4 feet wide. Medium growth rate. Afternoon shade or full shade, protected area. Any soil that is not extremely wet. Dark green leaves with white edges. Pinkish winter color. *We recommend planting close to your house on the north or east side.

Hesperaloe parviflora 'Brake Lights' (**Red Yucca**) - Zone 5. 2-3 feet high x 2-3 feet wide. Slow growing. Full sun. Dry to moderate, well-drained soil. Good for hot areas with reflected heat. Narrow, evergreen gray-green leaves edged with white fibers. 3-4 foot tall spikes of vibrant brake-light red flowers from late spring to mid summer. Attracts hummingbirds. Native to Texas and Mexico. Drought tolerant, but also grows well with regular watering. *NEW FOR 2016.*

Juniperus horizontalis 'Blue Chip' (**Blue Chip Juniper**) - Zone 3. 8-10 inches high x 8-10 feet wide. Slow to medium growth rate, about 1 foot per year. Full sun or partial shade. Dry or moderate soils. Silver-blue color. Forms an attractive, dense mat as a ground cover. Drought tolerant.

Juniperus sabina 'Calgary Carpet' (**Calgary Carpet Juniper**) - Zone 3. 6-12 inches high x 6-8 feet wide. Slow growth rate. Full sun or part shade. Dry or moderate soil. Soft green foliage. Drought tolerant.

Juniperus chinensis 'Spartan' (**Spartan Juniper**) - Zone 5. 15-20 feet high x 5-6 feet wide. Slow to medium growth rate. Full sun to part shade. Dry, moderate or moist, well-drained soil. Rich green color. Drought tolerant.

Mahonia aquifolium 'Compacta' (**Compact Oregon Grape**) - Zone 5. 2-3 feet high x 3-4 feet wide. Slow growing. Full to part shade, protected area. Dry, moderate or moist, well-drained soil. Bright yellow flowers in April. Edible bluish berries in late summer. Glossy evergreen leaves. Drought tolerant.

Mahonia repens (**Creeping Oregon Grape**) - Zone 4. 10-16 inches high x 10-16 inches wide. Slow growth rate. Full sun to full shade. Dry, moderate or moist, well-drained soil. Deep yellow flowers in April. Produces edible bluish berries August - September. Leaves are a dull blue-green, turning rich purple to red in winter. Tolerates alkaline soils. Drought tolerant Utah native.

Picea abies 'Pumila' (**Dwarf Norway Spruce**) - Zone 2. 3-4 feet high x 3-6 feet wide. Slow growth rate. Full sun or partial shade. Moderate to moist, well-drained soil. Broad globe shaped type. Good substitute for Dwarf Nest Spruce. Short, dark green needles.

Picea glauca 'Yukon Blue' (**Yukon Blue Dwarf Alberta Spruce**) - Zone 3. 5-8 feet high x 2-4 feet wide. Slow growth rate. Full sun or partial shade. Moderate or moist soil. Blue-gray needles, with brown buds at the branch tips. An excellent, hardy blue evergreen. Susceptible to spider mites, especially in afternoon sun.

Picea pungens 'St. Mary's Broom' (**St. Mary's Broom Globe Blue Spruce**) - Zone 2. 2-3 feet high x 3-4 feet wide. Very slow growing, 1 inch per year. Full sun or afternoon sun. Moderate or moist soil. Excellent blue color. Very compact globe shaped shrub.

Pinus mugo 'Slowmound' (**Slowmound Dwarf Mugo Pine**) - Zone 3. 3-4 feet high x 3-4 feet wide. Slow growth rate, about 3-6 inches per year. Full sun to morning sun. Dry, moderate or moist, well-drained soil. Forms a dark green, dense mound. Grown from cuttings for a consistent dwarf habit. Grows well in alkaline soils. Drought tolerant.

Pinus mugo 'Wintersonne' (**Winter Sun Dwarf Mugo Pine**) - Zone 2. 6 feet high x 4 feet wide. Slow growth rate. Full sun or partial shade. Dry, moderate or moist, well-drained soil. A beautiful shrub with bright green needles that turn electric yellow in the fall and stay that way through the entire cold season. Provides a bright spark of color in the winter landscape. Grows well in alkaline soils. Drought tolerant.

Taxus x media 'Dark Green Spreader' (**Dark Green Spreading Yew**) - Zone 4. 3 feet high x 4-6 feet wide. Slow growth rate. Afternoon shade or full shade. Moderate or moist, well-drained soil. Compact, spreading habit. Dark green needles. All plant parts are poisonous, if eaten. * We recommend planting close to your house on the north or east side.

Taxus baccata 'Fastigiata' or 'Stricta' (**Irish Yew**) - Zone 5. 15 feet high x 4 feet wide. Slow growth rate. Full shade or afternoon shade. Moderate or moist, well-drained soil. Very densely columnar habit. Dark green needles. All plant parts are poisonous, if eaten. * We recommend planting close to your house on the north or east side.

Thuja occidentalis 'Emerald' ('Smaragd') (**Emerald Arborvitae**) - Zone 3. 10-15 feet high x 3-4 feet wide. Slow growth rate. Full sun or partial shade. Moderate or moist, well-drained soil. Bright emerald green foliage that doesn't discolor in winter. Great for screening and hedging. Grows well in alkaline soil.

Yucca filamentosa 'Golden Sword' (**Golden Sword Yucca**) - Zone 4. 2-3 feet high x 3-4 feet wide. Slow growth rate. Full sun or afternoon sun. Dry or moderate soil. Ivory white flowers on 3 to 6 foot spikes in summer. Narrow green leaves with yellow center and sharp points. Drought tolerant.

Important Information About Growing BROADLEAF EVERGREENS in Utah:

Because of Utah's unique climate, Jerry's Nursery & Garden Center recommends that most broad-leaf evergreens (**Boxwoods, Euonymus, Hollies, Laurels, Rhododendrons, etc.**) be planted in shade or afternoon shade. Please refer to our descriptions and signs, and ignore any grower tags, books, or other information that suggests planting these plants in full sun.

Our combination of extremely low humidity, high altitude, hot summers, and cold winters is very hard on these plants unless they are somewhat protected. By contrast, the vast majority of the U.S. population lives much closer to sea level with high humidity and thicker atmosphere, which blocks some of the sun's rays. Their summers aren't as hot, and their winters aren't as cold, thus they can grow these same plants successfully in full sun.

We cannot guarantee broadleaf evergreens that are planted in full sun or afternoon sun unless it is a variety that our Jerry's Nursery & Garden Center descriptions and tags say you can plant there. Your success is our goal, so *please refer only to our tags and descriptions for cultural information.*
