

OBJECTIVE

Introduce additional resources for tutorial problem solving and reflection.

Creating shared notes and documenting academic problem-solving methodologies.

Accessible documentation to assist in resolving problems based on shared notes.

SKILLS EXERCISED

Knowledge Management (KM)

Root Cause Analysis (RCA)

Procedural Reasoning (PR)

When working through problems as a group, there are common information sources used for solving the problem. After those information sources are used, there is value in sharing that experience with peers. Common skills that could be introduced and developed in a process that shares that information are Knowledge Management, Root Cause Analysis, and Procedural Thinking.
