

## TELEHEALTH WITH KIDS

# WE COME TO YOU!

*Wondering how we can support your child during the COVID-19 pandemic?*

## VIDEO THERAPY APPOINTMENTS WITH KIDS CAN:

### BUILD & MAINTAIN CONNECTIONS

Videotherapy is a bit like a home visit - you have the ability to show us around your house, your favourite things, and where things happen in your home. This means that telehealth can take us places that in-clinic sessions can not.

### ALLOW FLEXIBLE WORKING

We can modify all our therapies for telehealth. Your psychologist will advise you (depending on age and ability) on how best to use the screen. We can send handouts, share a whiteboard for writing, do crafts, or zoom in and out when showing you strategies.

### BE EASY TO USE

We use a secure online platform for Telehealth. All you need is an internet connection and a private space in your home.

**Telehealth appointments are now Bulk Billed  
with no out of pocket expense to you**
