

Care and Maintenance

Thank you for choosing AXA Resurfacing.

The following guidelines have been formulated to provide you with instructions for the proper care and maintenance to ensure a long and useful lifetime for your tub. To keep your bathtub unit beautiful, we recommend the following steps:

1. **DO NOT** use the surface for 24 hours after refinishing work is completed.
2. Repair leaky faucets right away. Constant dripping will cause premature wear and drain rust.
3. To keep your bathtub surface in the best condition, **DO NOT** lay soap, shampoo bottle or any objects on the finish at any time for 30 days.
4. **DO NOT** use abrasive cleaners or cleaning pads, cleaners containing bleach or ammonia or any products containing harsh chemicals.
 1. Avoid completely rubber mats or any suction cup shelving.
5. **DO NOT** pick up surface dust off with fingers, any dust will dissipate in 3-4 weeks with normal cleaning and usage.
6. **DO NOT** drop, drag or place any heavy objects on the finish, which may cause it to chip or scrape.
7. Clean with warm water and liquid detergents or non-abrasive bathroom cleaners.
8. **Recommended cleaners are:**

-Lysol Basin & Tile Cleaner	-Mr. Clean (NO BLEACH)
-Simple Green	-Gel Gloss
-Scrubbing bubbles(NO Bleach)	- Fantastic

9. Use liquid soap or body washes as they rinse easily with water and help prevent bar soap residue. These will clean the surface without dulling the finish. We also recommend using a paper towels, washcloths, or soft sponges when cleaning.

* **AXA Resurfacing LLC work is guaranteed against fading, crazing and peeling for a period of _____ years from the date the original work was completed. The guarantee does not apply to customer neglect of the above listed items. Such repairs will be the responsibility of the customer and not the refinisher.**
