PALAZZANI

member of

www.palazzaniusa.com

In **1868**, the **Palazzani** family business, in Brescia Italy, began manufacturing bridge components, wooden packing crates and carriages. During World War I, the family foundry started to produce brass and bronze parts. In 1905, my family became the first manufacturer of taps in Lumezzane in Brescia and continues to this day to be very proactive in researching new and innovative solutions for plumbing fixtures for more than **30 countries**.
We can say today, "**Palazzani is a Global Brand**".

Without compromising the quality of material, design, engineering and production, Palazzani is **importing Italian decorative plumbing fixtures** at an affordable price in the USA market. Yes, that is correct, the Artisan Palazzani and Emporium will have a variety of handcrafted design product for your kitchen and bath. The Italian made products will maintain the all brass and chrome production and workmanship to sustain a product for many years of use.

"Over my life's career in my family's business heritage since 1868, I have valued Italian culture, design, and quality in the success of manufacturing. So, our future is today and tomorrow we continue to produce the finest design and quality of products for the health and lifestyle for our global customers".

ITALIAN MADE

CULTURE ■ DESIGN ■ QUALITY

Palazzani welcomes you to its prestigious headquarters in Casalmorano (CR), an establishment of 170,000 square feet on an industrial land of 365,000 square feet, created to house technicians, materials, state-of-the-art machinery and an organization whose first commitment is to complete customer satisfaction. In our new showroom of 5,000 square feet you can see all our production.

company

Selected materials,
first-class workmanship
ensure **quality,**
outstanding durability and
using lead free brass.

The
production cycle
is entirely performed
in the plant.

Over 100 years of Italian Culture

universal concealed system

thermostatic valve

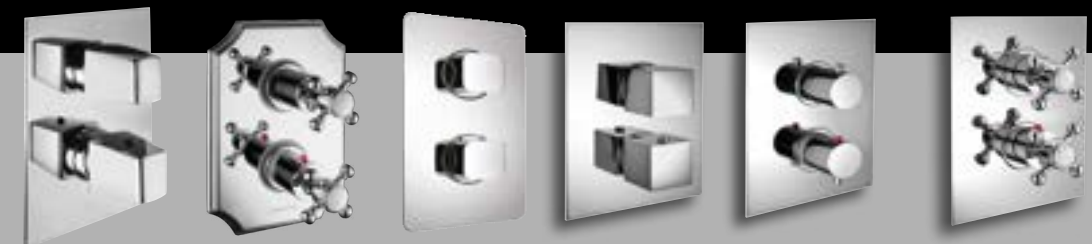

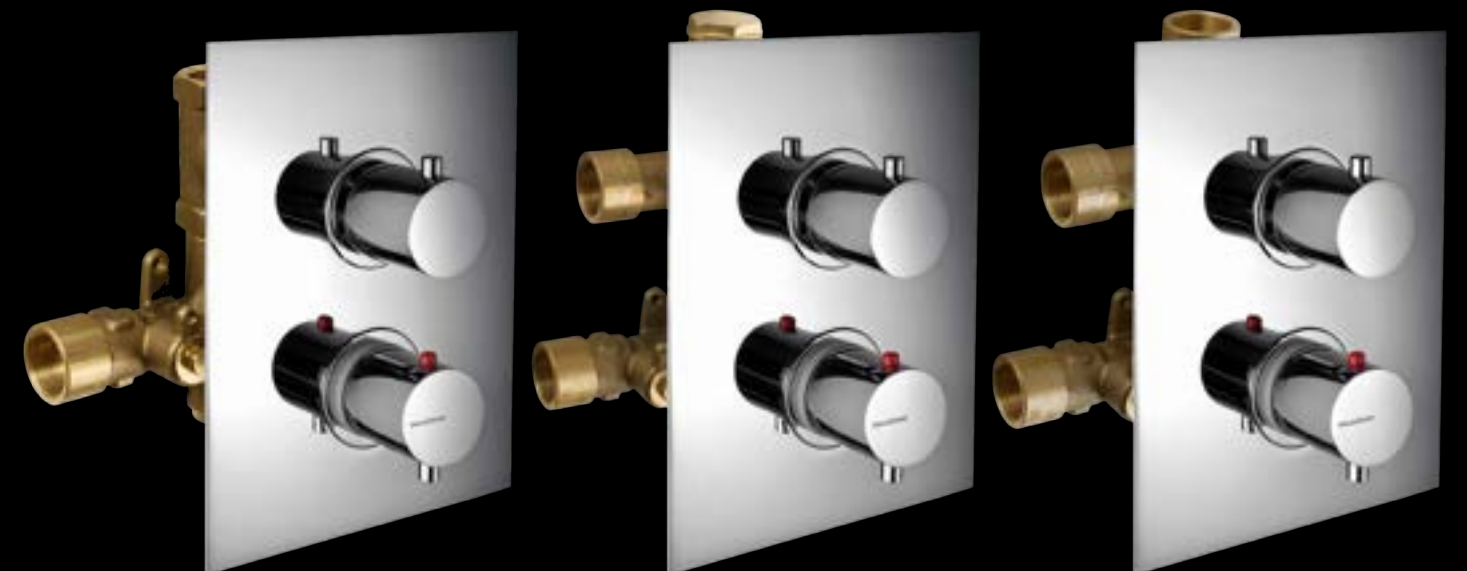

unico® 922772 992774 992776

Our rough valves

maybe installed
with a variety
of external trims.

- 1: The rough valves may be installed **with all design collections**.
- 2: Install **unico®**, the universal concealed body when fitting metal pipes.
- 3: When installing taps you can choose from among many ranges of single lever or thermostatic mixers, without the need for adapters or initial installation modifications. **Unico®** is designed for transforming itself into the single-lever or thermostatic mixer according to the customer's choice, thus permitting economic management of the installation. Also **unico®** is available in the version with an incorporated diverter and with **2** and **3 ways diverter**.

The simplest way to install
and choose your shower mixer

■ Palazzani invites you to a world of comfort and safety by using our energy and water saving shower system.

Acquaclima® technology provides constant flow of water temperature.

■ To avoid high temperature, **Acquaclima®** has a 38°C max stop button. This feature provides an internal anti-scalding system. You may enjoy a temperature a constant temperature setting.

■ **Acquaclima®** is an easy installation and maintenance.

Comfort, water saving,
energy saving, safety,
easy installation and **maintenance.**

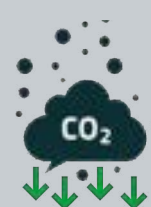

[cold start] Automatic Energy Saving

Hot water only when needed

Palazzani launches the **ColdStart** technology for the **Italo** and **Bella** faucet lines.

ColdStart reduces energy requirements **CO2 emissions**, using current technology. The innovative command ergonomics launches a new trend in the sanitaryware sector.

With **Palazzani ColdStart technology**, cold water flows when the handle is in the middle position. When the handle is in the central position with standard faucets, the water heater is activated immediately. However in the **ColdStart** faucet the water pipes are not filled with hot water instantly. The user can set the handle to the left. Remember, the right position of lever is not moveable.

Excellent arguments in favor of ColdStart

Your main sales argument is considered by the potential for savings. In fact, the purchase of a mixer with **ColdStart** technology allows a considerable saving of energy and even money.

From private customers to large hotels: the **ColdStart** assortment is certainly of interest for sale in the design activity.

Our Certifications

Our certifications are available on line www.csagroup.org

Declaration of Conformity

All Palazzani's taps with valve and mixers with the cartridge in ceramic disc are according to **UNI EN 817**.

All Palazzani's taps with thermostatic valves are according to **UNI EN 1111**.

All Palazzani's electronic taps are according to **UNI EN 15091**.

Brass Declaration

All Palazzani's taps are made with the **brass conform** to:

- Brass CW 614N-UNI EN 12164 (turnig brass)
- Brass CW 617N-UNI EN 12165 (molding brass)
- Brass CuZn 37 Pb-UNI EN 753s (casting brass)

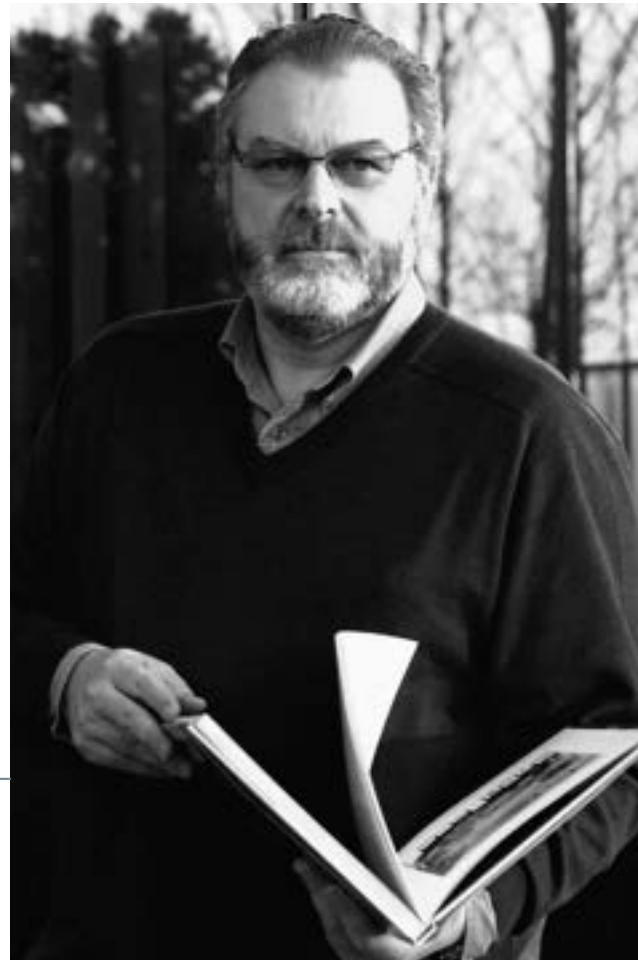

■ The faucet is designed and industrialized in PALAZZANI technical office to endure over time and that is why every product must pass stringent internal testing and challenging tests in our laboratories.

Chrome-plating

The Palazzani's Chrome plating is according to **UNI EN 248**.

The chrome-plating is designed to withstand a test of more than 200 hours in saline ambient. The taps surfaces are coated with layers of nickel and chrome up to 20 microns thickness.

▪ **Antonio Bullo** is not only a successful sculptor and teacher of Industrial Design of the I.S.I.A. of Faenza, Italy, but is also an Italian designer, whose large part of activity is dedicated to design the bathroom ambience. He has achieved important success designing ceramics, taps and faucets and has obtained important awards, but above all he has always earned consumer appreciation for the innovation, useful practicality and purity of his work's unmistakable lines. In this catalogue you'll find the products designed by Antonio Bullo for Palazzani.

Antonio Bullo

▪ **Andrea Zani** graduates in industrial design at Machina Lonati Fashion and Design Institute in 2005. His vocation as an industrial designer takes him to a constant quest for realities where craftsmanship of products and search for new lines blend. This allows him to create objects with innovative design that perfectly fit with the daily demands of the market. His portfolio consists of essentials objects with a rigorous shape but timeless. His collaboration with Palazzani concerns the restyling of some series of taps.

PALAZZANI

Our bodies need the sun’s light to live

Chromotherapy is the science of using colors to adjust body vibrations to frequencies that result in health and harmony. Each color possesses frequencies of a specific vibration, and each vibration is related to different physical symptoms.

And that light can actually be broken down into a seven color spectrum. An imbalance of any of those colors can manifest itself in physical and mental symptoms.

Color therapy works on various energy points to help balance your body via the full spectrum of visible light, each color addressing a distinct need.

Color and light have been utilized by healers for thousands of years. Color therapy possibly has roots in Indian medicine (Ayurveda), ancient Egyptian culture and traditional Chinese healing. Alternative medicine practitioners who use chromotherapy often relate the seven colors of the color spectrum to specific body areas.

Our colors

- 

White - since all colors are present, white does everything on all levels: physically, emotionally, mentally and spiritually. White is about purity, innocence, softness, illumination, release, brilliance, radiance, transcendence.
- 

Blue - lubricates joints, helps address stress, nervous tension and infections.
- 

Yellow - the brightest color used in chromotherapy, has been used to purify the skin, help with indigestion, strengthen the nervous system, treat glandular diseases, hepatitis and lymphatic disorders and assist metabolism.
- 

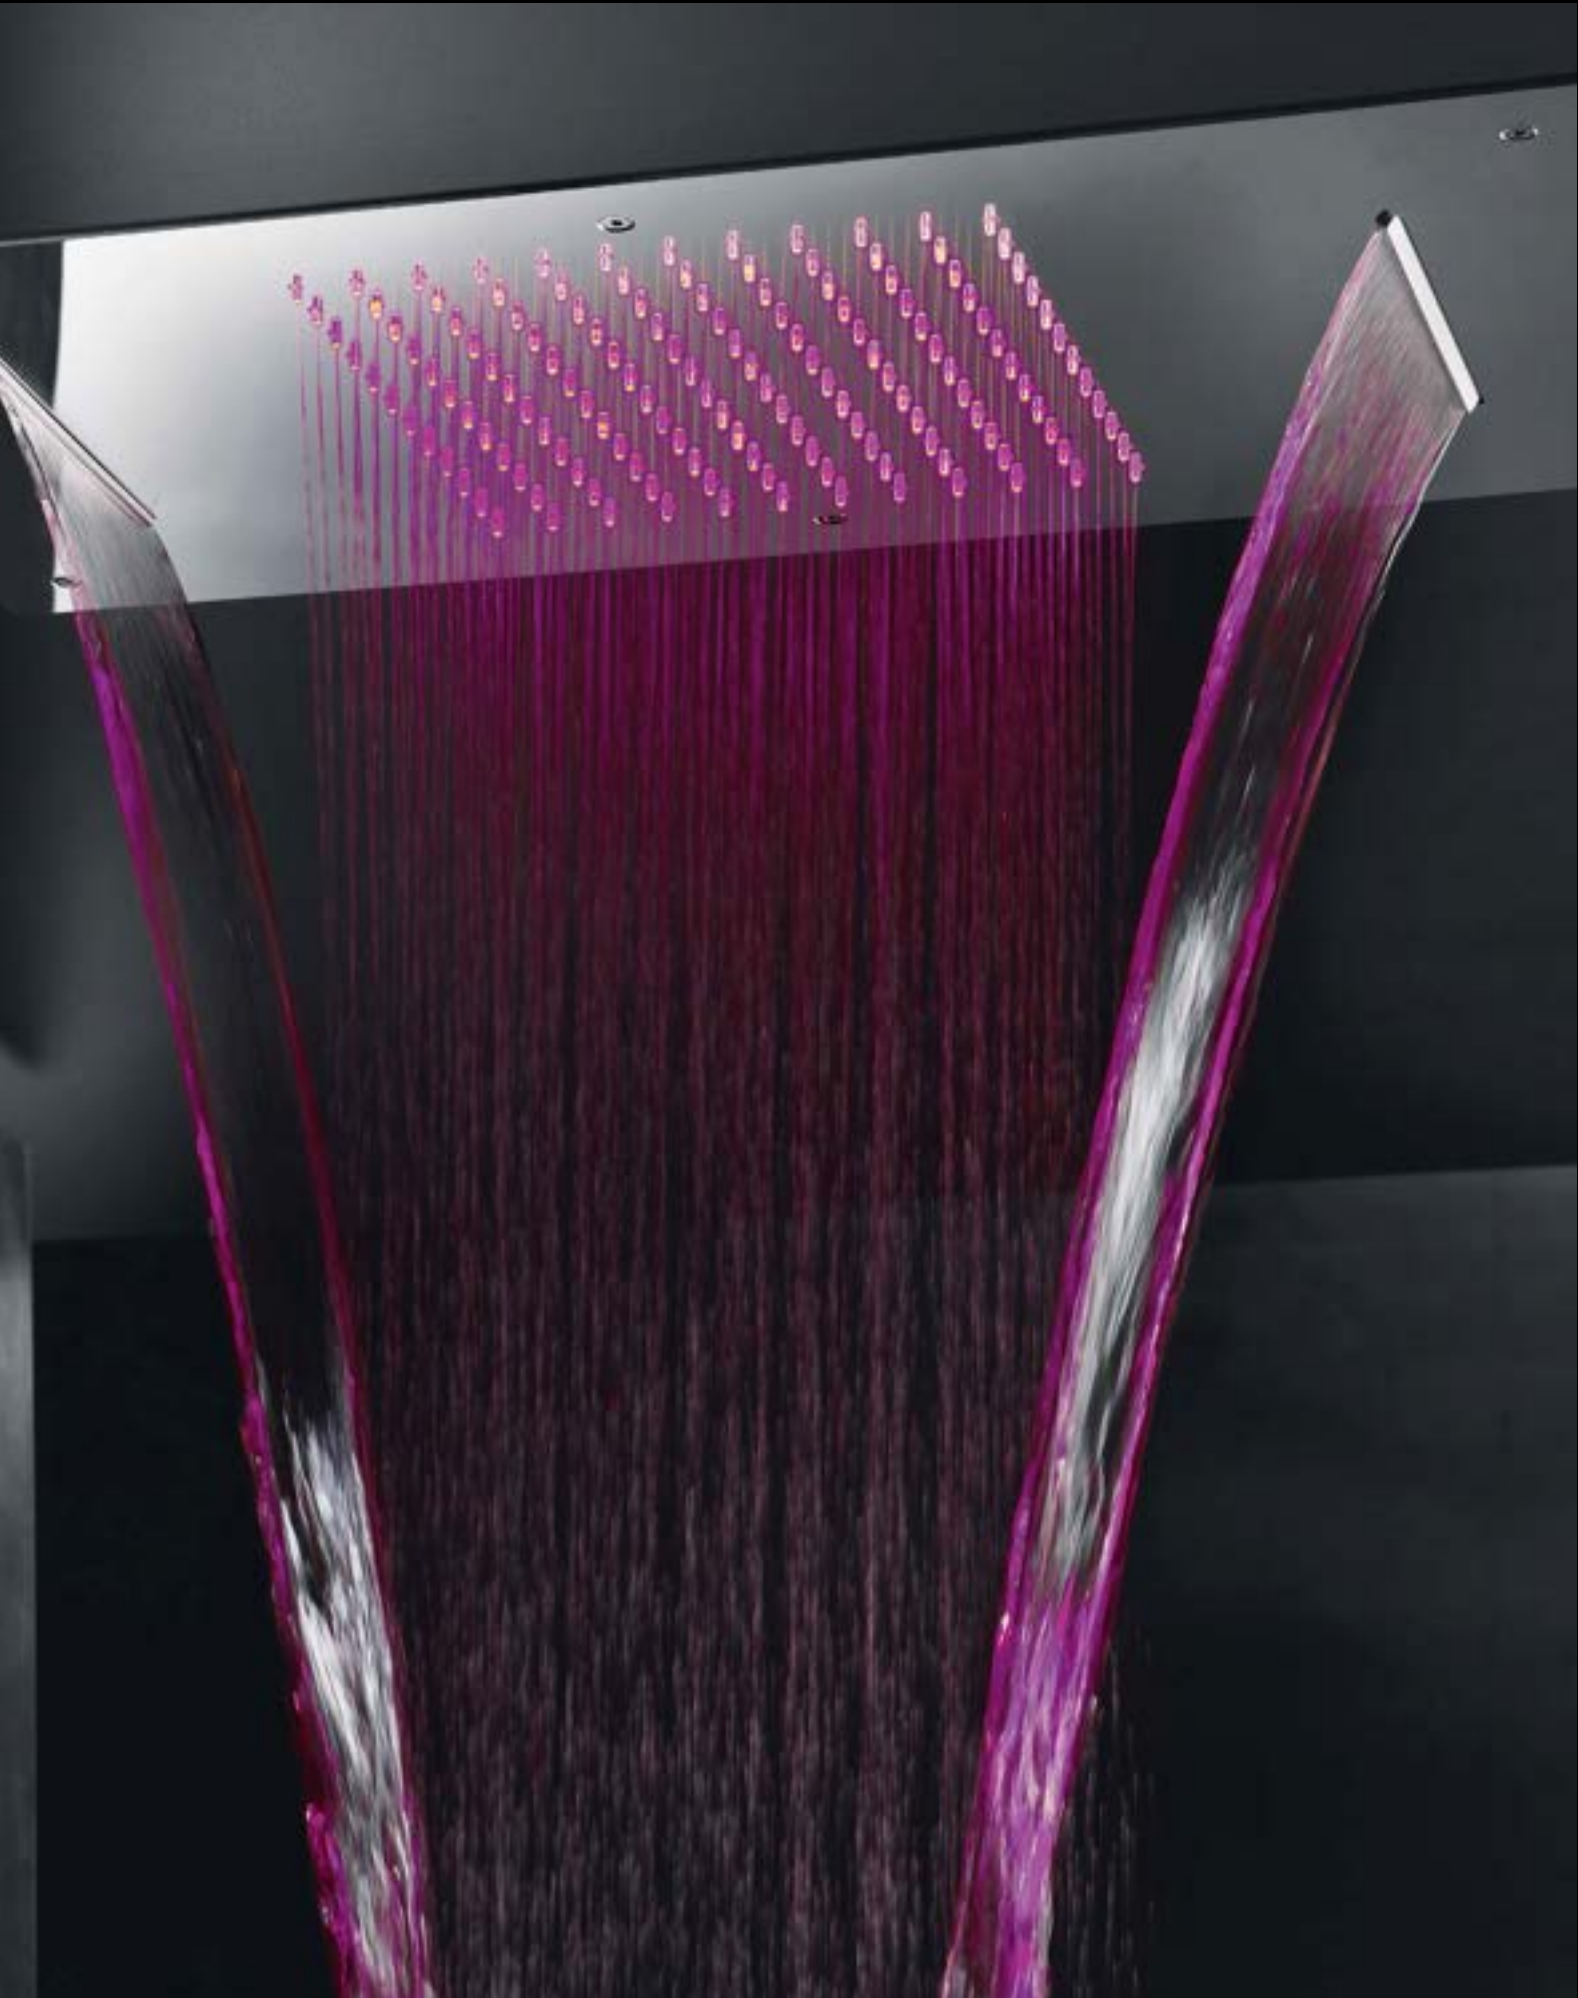

Orange - is a mixture of red and yellow. Activates and eliminates localized fat. Assists with asthma and bronchitis
- 

Purple - is used to calm the nervous system, soothe organs and relax muscles. Violet has meditative qualities and is often used to treat conditions of the lymphatic system and spleen, as well as urinary disorders and psychosis.
- 

Red - is believed to increase the pulse, raise blood pressure and increase the rate of breathing. Red would be applied to support circulatory and nervous functions.
- 

Green - a color associated with harmony, provides a neutral, positive calming effect.
- 

Magenta - activates and eliminates impurities in the blood stream.

Our bodies need the sun’s light to live

Chromotherapy is the science of using colors to adjust body vibrations to frequencies that result in health and harmony. Each color possesses frequencies of a specific vibration, and each vibration is related to different physical symptoms.

And that light can actually be broken down into a seven color spectrum. An imbalance of any of those colors can manifest itself in physical and mental symptoms.

Color therapy works on various energy points to help balance your body via the full spectrum of visible light, each color addressing a distinct need.

Color and light have been utilized by healers for thousands of years. Color therapy possibly has roots in Indian medicine (Ayurveda), ancient Egyptian culture and traditional Chinese healing. Alternative medicine practitioners who use chromotherapy often relate the seven colors of the color spectrum to specific body areas.

Our colors

White - since all colors are present, white does everything on all levels: physically, emotionally, mentally and spiritually. White is about purity, innocence, softness, illumination, release, brilliance, radiance, transcendence.

Sky Blue - promotes relaxation and calm. Blue exhibits tranquilizing qualities often used to relieve headaches and migraines, colds, stress, nervous tension, rheumatism, stomach pains, muscle cramps and liver disorders. Blue is thought to have a positive effect on all kinds of pain.

Purple - is used to calm the nervous system, soothe organs and relax muscles. Violet has meditative qualities and is often used to treat conditions of the lymphatic system and spleen, as well as urinary disorders and psychosis.

Green - a color associated with harmony, provides a neutral, positive calming effect.

Blue - lubricates joints, helps address stress, nervous tension and infections.

Yellow - the brightest color used in chromotherapy, has been used to purify the skin, help with indigestion, strengthen the nervous system, treat glandular diseases, hepatitis and lymphatic disorders and assist metabolism.

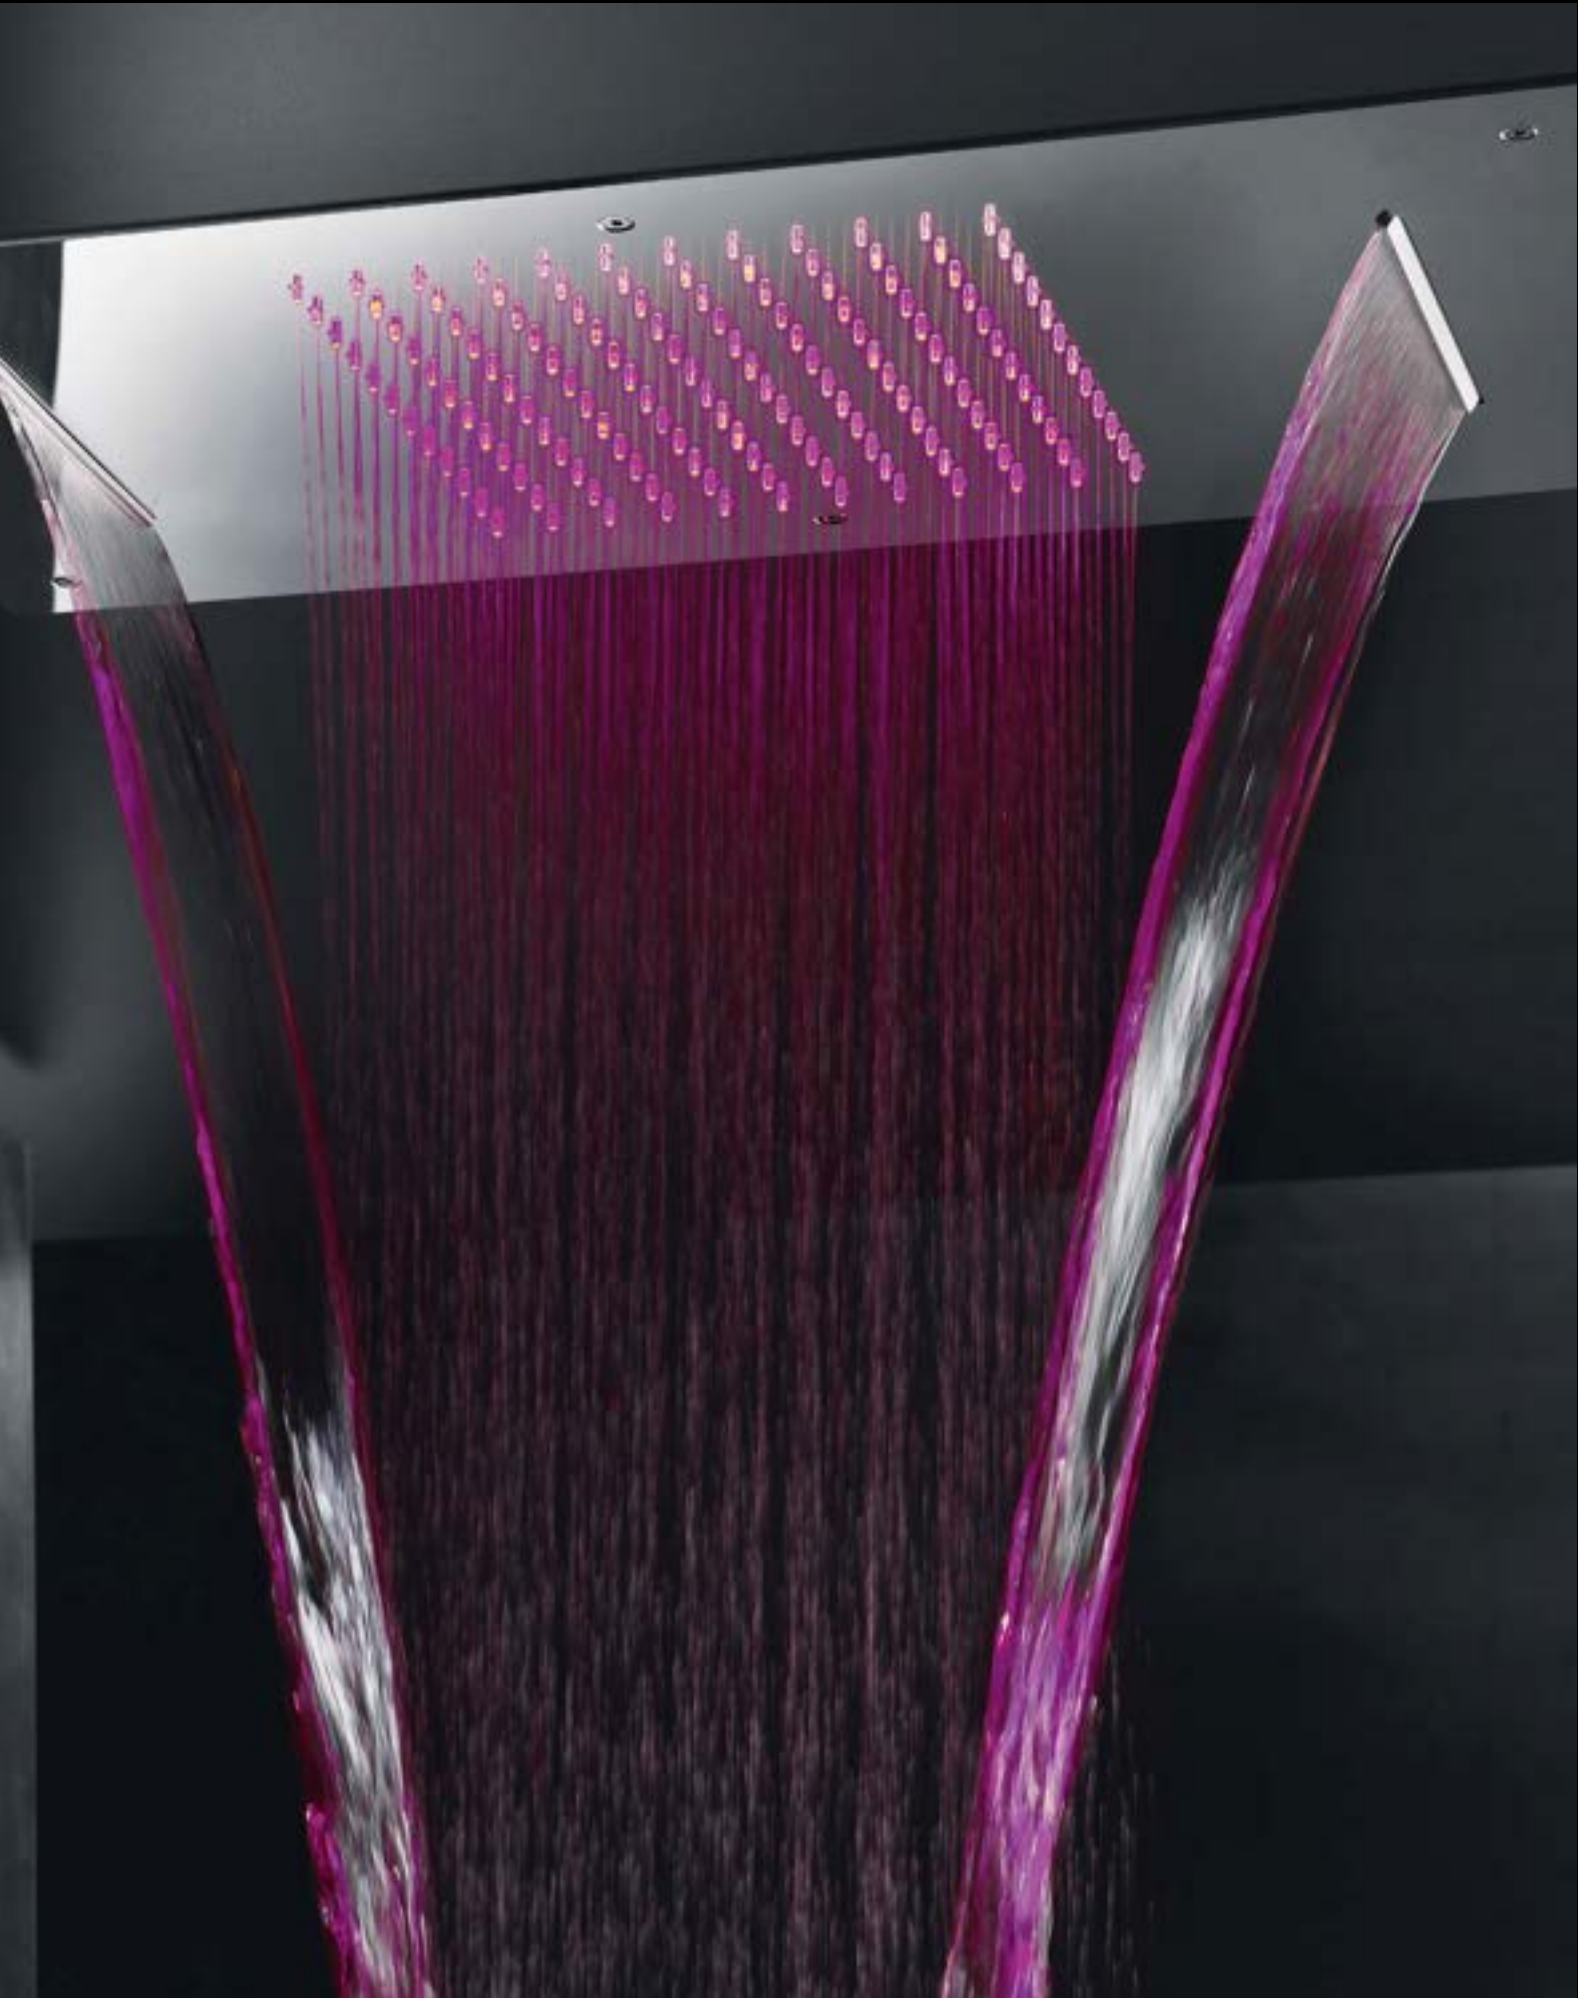

Orange - is a mixture of red and yellow. Activates and eliminates localized fat. Assists with asthma and bronchitis

Red - is believed to increase the pulse, raise blood pressure and increase the rate of breathing. Red would be applied to support circulatory and nervous functions.

Magenta - activates and eliminates impurities in the blood stream.

· Inox headshower, 28" x 15", 2 ceiling outlets, with chromotherapy, remote control included. max flow: 2.5 GPM.
