

# Symptoms of Possible COVID 19

- Fever (Oral temperature of at least 100.5° F or 38. 5° C)
- Agusia/Dysgusia (loss of sensation of taste or unusual or bad taste in mouth)
- Anosmia (loss of sense of smell)
- Nausea/vomiting or Diarrhea
- Malaise (Feeling weak and tired)
- Myalgia (Muscle pain)
- Headache
- Nasal congestion/coryza
- Cough
- Dyspnea (RR> 22) or blood oxygen saturation ≤ 95%, (Shortness of breath, breathing more than 20 times per minute)
- Tachycardia (HR >80) Pulse rate

**Any symptoms suggestive of COVID, please obtain following tests:**

1. Nasopharyngeal or oropharyngeal COVID 19 antigen test (rapid with results in a few hours) If antigen test is negative or not available get RTPCR test. Antibody test is not helpful and not recommended.
2. Complete blood picture
3. Serum LDH
4. Serum Creatinine
5. CRP
6. Serum Ferritin

For the appointment please call 7893003300 and bring with you all the medications you are currently taking. Please bring reports of any prior medical evaluations, lab tests, X ray, CT, MRI etc.

Please wear a mask when coming for your appointment.
