

LTB

Liquid Tire Balance

Balance tires with this easy-to-use liquid product that virtually eliminates all the labor intense efforts associated with lead weights. Because it is liquid, LTB's unique formula also allows us to include rust inhibitors that prevent rust from forming inside the tire rim. We also include lubricants which allows the bead area to remain flexible longer. These additives make for easier tire changing later.

Liquid Tire Balance effectively creates a counterweight inside the tire. The basic effect relies on the laws of physics. Centrifugal force pushes the liquid into the low spots inside the tire, directly opposite the heaviest spots, counter-balancing most out-of-balance conditions.

- Eliminates rim rust and wheel corrosion
- Makes dismounting easier which preserves casings for retread
- Freeze protection to -40° F
- Unlike beads and powders, LTB will not clog valve stems
- Will not effect your TPMS
- Makes mounting and dismounting easier
- Keeps tires cool
- Available in quantities of:
 - 20 oz. bags, 4 per case
 - 32 oz. bottle, 4 pack and 12 pack
