PAINT PRODUCTS

- Clean and protect your spray equipment.
- Prevent rust, corrosion, premature wear, and prolong the life of your equipment.
- We make fluid products for commercial paint sprayers and pressure washers that are compatible with all manufacturer's makes and models.

Pump Protector

- Delta First's standard Pump Protector is a concentrate. This means it is meant to be diluted with water in the field and used as a final rinse.
- Contains both lubricants and corrosion inhibitors which will prevent rust from forming in your equipment, and which keep all the lines flexible and lubricated to maximize the life of your equipment.
- Stops premature wear which shortens the useful life of your equipment.
- Prevents sticking seats which prevent smooth operation of your sprayer.
- Also available in cold weather formulation.

Available in 8 oz, 32 oz or 1-gallon sizes

THROAT SEAL (Packing Saver)

- To be added to the wet cup of an airless paint sprayer to help protect the bearings and packings from damage.
- Fly away paint droplets released in the air during the spray process can cause abrasions and premature wear on the delicate packings that surround the piston of the sprayer. This product helps to keep the packings dry at all times, and to keep them as free as possible of paint droplets.

Available in 8 oz and 32 oz, sizes and in both cases they come with a nozzle tip to make

PAINT PRODUCTS

SPRAY GUN LUBE

- This unique product is designed to keep paint from drying in the little nooks and crannies of a spray gun.
- By coating your spray gun in advance with this lubricant, paint will not be allowed to dry on the any surface that has spray gun lube on it.
- Actually a “plasticizer” which simply means that it keeps paint from drying anywhere it exists. So, when you go to clean up at the end of the day, if you have treated your gun in the morning with spray gun lube, the paint which has accumulated will wash right off, helping keep your equipment clean and allowing it to operate longer.

Available in 2 ounce bottle with a Yorker cap (small nozzle tip) which allows you to apply then product directly into the areas you wish to protect.

HYDRAULIC OIL

- Delta First supplies a premium hydraulic oil for use in lubricating your equipment in the field.
- This AW (anti-wear) ISO 32 hydraulic oil contains anti-wear additives, as well as anti-foaming and anti-rust packages to keep your equipment operating in peak condition.
- Delta First has for years supplied hydraulic oils to OEM's in the airless sprayer industry, and will continue to offer the best oils available for your sprayers.
- Meets rigorous performance requirements, including Denison (HF-0 and HF-2), Cincinnati Milacron (P-68, P-69, and P-70) and Vickers (M-2950-S and 1-286-S). This oil is designed for use in high pressure pump systems, and passes a 100 hour test at 5,000 psi with no signs of wear or distress.
- Suitable for both piston and diaphragm airless sprayers.

Available in either quart bottles (12 per case), gallons (4 per case) or bulk containers (pails, drums or totes).
