- Kevin Birthday may 20th!

### TRANSITIONS TO POST 21

Post21 family is growing! We are starting to Transition new friends to our program. As the school year is coming to an end there are many young adults that are graduating. Please keep watching/following for when our new friends will be joining our program in the months ahead!

April's birthday celebrations. Peju and Alex birthday's were celebrated with some yummy cake and birthday songs!

Earth day was a day to show we care, so the participants along with the Engagement facilitators walked around and collected some garbage. We watched videos about the earth, and played some games about Earth day. Great work all on finishing all the answers! Do you know what year Earth day started? 1978? 1970? 1972? If you guessed 1970! You got that right!

Then to celebrate the fact that spring is upon us, we completed a flower experiment, used white flowers and with the help of coloured water we watched as the flowers changed their colour over the course of a few days. Results were amazing!

For Easter- eggs were blown, painted some even were made from paper to take home for all to enjoy! Did you get them? They liked making them. it was a great sensory for all! Lets see what May will bring!!!!
